

Ultimate Real-Time Effects App Camera 2 by JFDP Labs

Now Available for Intel® Atom™ Tablets for Android*

Editing photos or video after the fact is a useful way to make the best of captured memories. Putting a twist on things a bit with personalizing the feel of special shots during the recording process can be even more convenient, and a lot of fun. JFDP Labs' real-time effects app, Camera 2, has been optimized for Android* tablets. The filter and effect options allow a personal touch on images and video, as a user is actually taking them.

Camera 2 features many unique, high-quality effects grouped as options into common themes. Thanks to the Old Time category, a user's camera can look as if it's right of a particular decade, 1920s-1980s. The Lomos and Vintage options provide more subtle retro effects. The Comic and Sketch categories offer half-tone, black & white, and printed comic effects. The Art option turns a photo or video into a piece of art, with just a tap on the screen. The Sci-Fi and Computer filters round out the personalized feel choices, exceeding the creative needs of just about any user.

Enhanced Personalized Camera Experience Reaches New Audience on Intel Atom Tablets for Android*

Android* tablets provide a platform with a perfect fit for the capabilities of the Camera 2 app. The high-functioning camera and video options of the device are elevated with even more with the additional features and benefits. The high-resolution and sensitive touch screen allows users to make selections and edits perfect, every time.

Users can now download Camera 2 to start using the best in effects, all in real-time. The flexibility and mobility of Intel® Atom™ tablets for Android* allow users to enjoy the fun array of recording options from anywhere they want to capture and share their creations.
