IP Cam Viewer Application Simplifies Remote Security

Now Available for Intel® Atom™ Tablets for Android*

Expensive and complicated security systems are unnecessary now that accessing and controlling remote cameras is possible with the IP Cam Viewer app from Hit-Mob.com. This remarkable, award-winning tool provides Android* tablet users with a host of versatile features, enabling them to operate IP Cameras, DVRs, Network Video Recorders and web cams.

Equipped with SSL and HTTPS security encryption, the IP Cam Viewer app makes it easy to remotely control and automate a wide variety of security measures with the tap of a finger. Supporting a range of formats and devices, this simple interface lets users pan and tilt feeds, toggle between multiple screens, import and export footage and activate other devices like lights and automatic doors. Other handy features include a motion detection option, background audio, browser integration, even remote accessibility to the application itself. Customized control of surveillance systems is now easily accomplished with IP Cam Viewer.
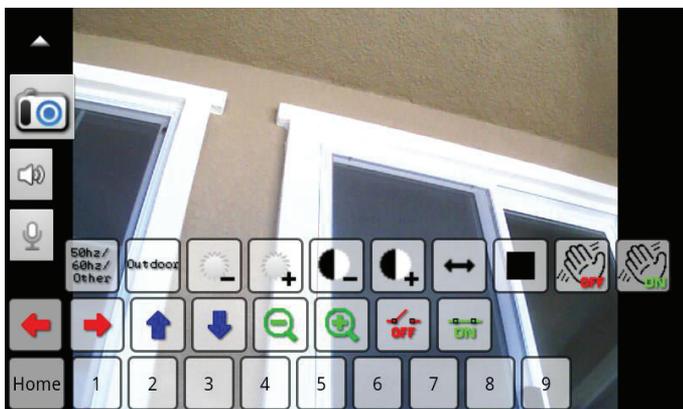

Added Protection and Lightweight Portability with Android*

Downloading the IP Cam Viewer app onto responsive, high-performance Android* tablets brings all the convenience and productivity of a sophisticated security system into users' hands. The sensitive touch screen and crisp display lets users view and control their equipment from any location. This implementation eliminates the need for costly onsite personnel and allows otherwise complicated operations to become simple and instant. The IP Cam Viewer solves the problems of elaborate surveillance all within one, neat application.

Features of IP Cam Viewer for Intel Atom Tablets for Android*

- Clear, High-resolution Interface
- Remote Operation of Multiple Cameras and Devices
- Audio and Motion Detection Automation
