

Guardly is an employee safety platform that enhances emergency notification, communication and management using the latest cloud, mobile, indoor and real-time technologies

Guardly is used in:

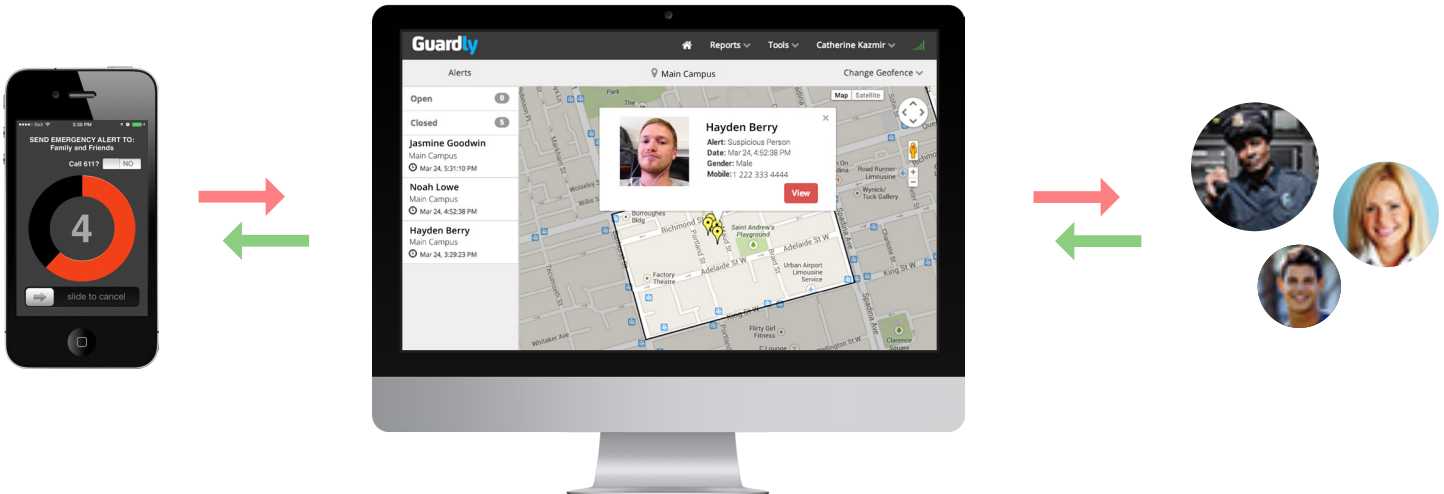

- Corporations
- Schools
- Oil, Gas & Mining
- Retail
- Corporate Properties
- Transit Systems
- Healthcare Facilities
- Energy

Guardly Command™ for Security Operations

A cloud-based end-to-end incident management platform that helps Security Operators access real-time location and situational data to make faster, informed decisions.

Mobile Apps for Individuals you Protect

Guardly transforms smartphones into personal emergency blue light phones that can remotely alert Security Operators from anywhere within predefined geofences.

Indoor Positioning System

Transmits building, floor and room location of an emergency caller and tracks ensuing changes to indoor location.

Mobile Mass Notification System

A scalable infrastructure that allows 500,000 geotargeted mass notifications to be sent within seconds.
