

Faster, Easier Messages with Record-breaking Fleksy Keyboard

Enabled for Intel® Atom™ Tablets for Android*

Intel has collaborated with Fleksy to bring its keyboard app to a larger audience of mobile device users by optimizing for Android* tablets. Fleksy is the fastest keyboard in the world, and so comfortable that users can even type without looking. Enjoy fluid and fast content production on an Android* tablet today.

Taking a big step forward in keyboard technology, the app employs a different method than traditional keyboard interfaces to intuit users intentions, making quick, accurate typing effortless. Fleksy's next generation auto correction takes the frustration out of editing, further reducing time and increasing productivity. Users can swipe for spacing, deletion and scroll through autocorrect options. Delivering to the cloud or social media platforms is simple with the tap of a finger, colorful themes make typing a pleasant experience and over 600 different Emojis give users a wide palette of creative expression.

Cutting Edge Messaging for Intel Atom Tablets for Android*

Mobile device users can take advantage of this new efficient way to produce effective, accurate content on their high-resolution Android* screens. The sensitive touch capabilities make the tap-and-swipe mechanism simple and hours of solid performance mean that users can produce and deliver important information from wherever they travel. Fleksy is an excellent complement to the lightweight portability of these responsive, dependable tablets.

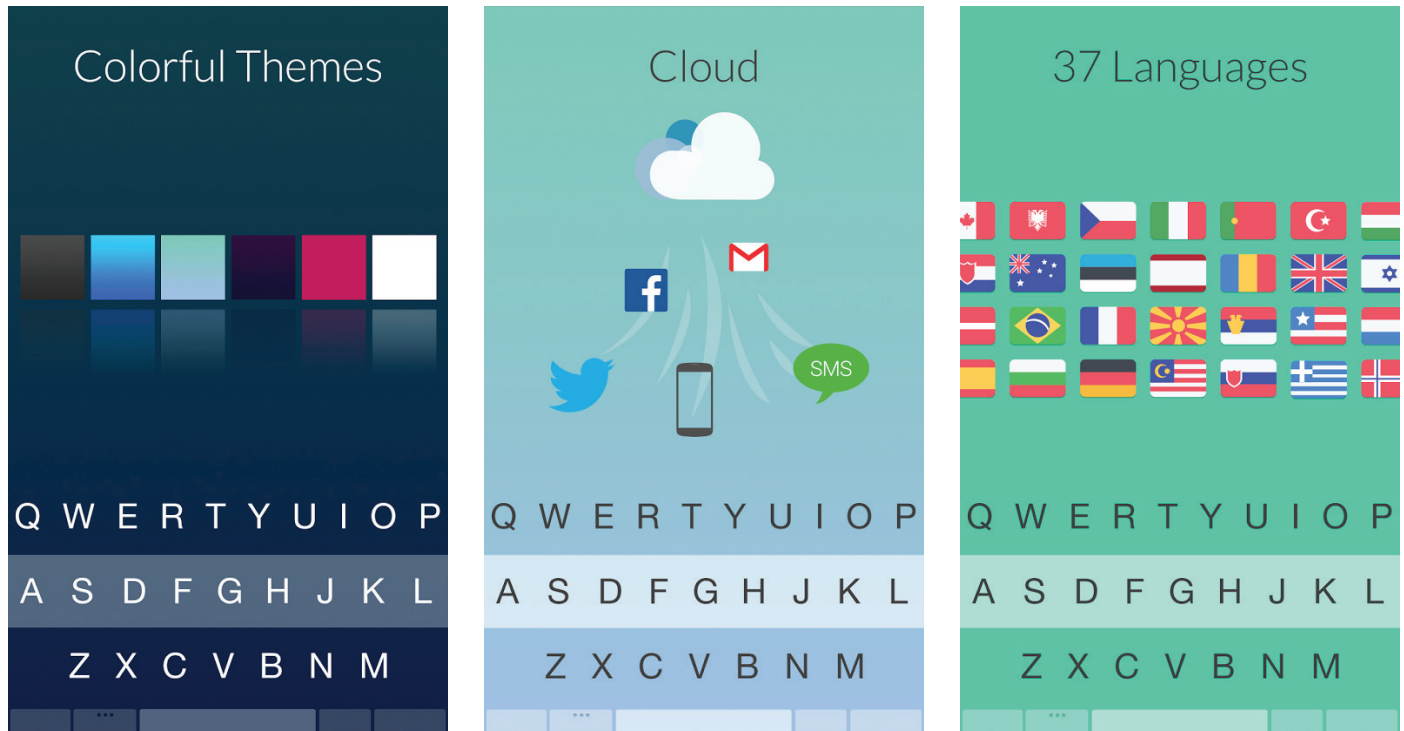

This revolutionary application is changing the nature of messaging; Intel supports innovative methods that save users time and allows them additional precision, even making typing more fun and versatile.

Features of Fleksy Keyboard for Intel Atom Tablets for Android*

- Superb Intuitive Interface
