

Baby's Brilliant App

Baby's Brilliant app now available on the Apple App Store

An app that provides quality educational videos and music for babies & toddlers

LOS ANGELES - August 20, 2014 - Available today, the Baby's Brilliant app features high-quality educational videos and music that introduces babies and toddlers to concepts such as numbers and colors, and helps them relax at nap time and bedtime. The app provides over 200 in-app downloads produced by one of Hollywood's top movie trailer producers and his wife.

The wide array of video and music categories includes Educational, Entertaining, Lullabies, Nature, Classical, Night Lights, Popular Children's Songs, and more. Some videos and songs are featured in Chinese, French, German and Spanish. Parents, grandparents and caregivers can create playlists so that videos and songs play automatically for young children in the order of their choice. Parental controls prevent children from making in-app purchases.

The free Baby's Brilliant app is available for iPhone, iPad and iPod, and includes three free downloads. Additional videos and songs cost only 99 cents each.
