DR. ANTHONY GEROULIS UTILIZES DERMAPEN MICRO NEEDLING TREATMENT TO DRAMATICALLY IMPROVE STRETCH MARKS

North Shore Center for Facial Plastic & Cosmetic Surgery, overseen by board-certified cosmetic surgeon Dr. Anthony Geroulis, has spent the last year conducting a study on the efficacy of Dermapen Micro Needling Skin Therapy for stretch mark minimization. After several treatments on a variety of patients, the results have shown that it is a highly effective treatment method.

NORTHFIELD, IL—AUGUST 6, 2014— North Shore Center for Facial Plastic & Cosmetic Surgery, the leading cosmetic facility overseen by board-certified cosmetic surgeon Dr. Anthony Geroulis has been using Dermapen Micro Needling for over a year to help patients treat anything from acne scarring to fine lines. This cutting edge fractional needling therapy was introduced to the north shore of Chicago a little over one year ago when it was exclusively offered by Dr. Geroulis.

Dermapen's non-invasive refinishing technology works on all skin types to correct a variety of imperfections. Dermapen is a pen-like device containing eleven micro needles that create a series of vertical, yet minor penetrating stamps which induce critical collagen production and stimulates cell regeneration so that skin heals itself to a thicker, smoother and more even texture. While its ability to correct facial imperfections has long been demonstrated, its efficacy in improving stretch marks was not fully determined. Over the last year, Dr. Geroulis and his surgical team have conducted trials on several patients with stretch marks on their breasts, abdomen and thighs to test its success. The results have been fantastic. Patients have noted that their stretch marks have significantly blended, faded and smoothed out after several treatments. During each treatment, a potent specialized serum is applied, designed specifically for stretch marks, to help speed up the healing process.

"For years, many individuals have struggled to improve and reduce stretch marks. They are pesky, difficult to hide and even more challenging to remove. After seeing the wonders

Dermapen has had on my patient's stretch marks, I now truly believe it can help a lot of individuals," Dr. Geroulis explains.
