One Million Hits On iPatientCare's Newly Launched 'EHR Evaluation Tool'

iPatientCare invites primary care physicians to evaluate their existing EHR systems against ideal EHR implementation expectations.

iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR and integrated Practice Management solutions announced its newly launched 'EHR Evaluation Tool' reaching to a million hits.

The innovative EHR evaluation tool developed by iPatientCare helps physicians to evaluate their current stage of EHR implementation with respect to usability, interoperability and credibility. Primarily, physician community is very keen in

learning more about these important challenges; mainly usability, interoperability and credibility, and hence, the tool launched by iPatientCare has received an overwhelming response since it was launched on July 29th.

"The phenomenal response to our tool shows that enormous numbers of primary care physicians are very concerned to about their existing EHR software and implementations", said John Bartley, MD, Chief Medical Director, iPatientCare. Adding further, he commented, "It is extremely concerning that the average satisfaction in existing EHR implementation computed by the tool is alarmingly low because of the existing EHR's disappointing scores on satisfying typical practices' needs for specialty-focus, customizable workflow and templates, communicating with labs, pharmacies and other physicians' offices; and responsive and accountable implementation/training/ongoing support."

Challenges faced while implementing EHR by small and medium sized practices have severe financial repercussions, and hence, practices across the nation wonder which EHR to choose from?

"iPatientCare has consistently worked on improving EHR features to make its EHR more usable for small and medium sized practices. Our focus on continuous user engagement has resulted in highly satisfied practices. We understand their needs around usability and interoperability which we serve through our talented people committed to delighting our customers.", said Udayan Mandavia, CEO, iPatientCare .

About EHR Evaluation Tool

iPatientCare is committed to provide personalized EHR and integrated Practice Solutions to small and medium sized practices. We understand the exact pains experienced by typical practices in implementing EHR/Practice Management Systems and Clinically-driven Revenue Cycle Management. The EHR Evaluation Tool is an attempt to assess the impact of existing EHR implementations on overall practice satisfaction with respect to usability, interoperability and credibility. We believe in continuous user engagement via numerous innovative forums/platforms that increase the possibilities of knowledge dissemination and getting to know the concerns of iPatientCare users.

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at **ONC Certified Health IT Product List.**

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).

The company has won numerous awards for its EHR technology and is recognized as an innovator in the field, being a pioneer to offer an EHR technology on a handheld device, an innovative First Responder technology to the US Army for its Theatre Medical Information System, the first to offer a Cloud based EHR product. iPatientCare is recognized as one of the best EHR and Integrated PM System for small and medium sized physicians' offices; has been awarded most number of industry Awards; and has been recognized as a preferred/MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and academies.
