

iPatientCare Announces National User Conference 2014, featuring Education, Exhibition and Entertainment, from November 14 through 16, 2014

Great User Engagement Event from iPatientCare - National User Conference 2014,

iPatientCare, Inc., a pioneer in mHealth and cloud-based ambulatory EHR and integrated Practice Management solutions announced today the much awaited annual event, namely, National User Conference (NUCON) 2014, to be held from November 14 through November 16, 2014. iPatientCare's annual user conferences focus on education/exhibition/entertainment, involve national participation of iPatientCare users and channel partners, and generate great excitement and applaud for the series of presentations involving sneak preview of the future product releases and fun events engaging the entire iPatientCare community.

Like every year, NUCON-2104 will provide a great opportunity of learning about the latest developments with iPatientCare product suite, and of course, would unite and connect iPatientCare channel partners, end users, certified professionals, business partners, and employees of iPatientCare.

"As a leader in Ambulatory Market Space, we constantly work towards enhancing the user experience for our solutions and increase their efficiency with reduced costs, improved quality and better outcomes. NUCON-2014, like every year's NUCON, will provide an amazing opportunity to learn how newer technologies offered by iPatientCare can contribute to making practices' workflow efficiencies and serve patients more effectively.", said Kedar Mehta, CTO, iPatientCare.

"The overwhelming success of NUCONs has encouraged us to come with yet another episode of exciting annual event", said Pranav Patel, General Manager, iPatientCare. He further added, "We are all set to kick-off the holiday season over the wine, cheese and chocolates and the special gift pack."

About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company is known for its pioneering contribution to mHealth and Cloud based unified product suite that include Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and mobile point-of-care solutions that serve the ambulatory, acute/sub acute, emergency and home health market segments.
