Registration Gateway®
by SRC Solutions, Inc.

Save time. Cut costs. Reduce legal risk. Increase funding opportunities.
All with Registration Gateway®

What is Registration Gateway?

Registration Gateway is the only truly paperless enrollment software on the market. Registration Gateway simplifies the K-12 student registration process, enabling administrators to shave costs, reduce legal risk and make the most of funding opportunities.

An Ever-Growing Problem

K-12 student registration has become an increasingly outdated, slow process. Yet registration is projected to increase 4%—and the cost per student to increase 8%—every year through 2014.

Old Systems, Hidden Risks

Outdated processes expose schools to more and more legal risks. From government compliance to HIPAA exposure, the current process leaves schools exposed to costly lawsuits and fines.

The Registration Gateway Solution

Registration Gateway takes a process that once took up to two hours per student and reduces it to mere minutes. With Registration Gateway, administrators can shave costs, reduce legal risk and make the most of funding opportunities.

Registration Gateway integrates directly with all major School Information Systems (SIS)!

Reaping the Benefits

Superintendents, IT Managers and Administrators all over the country are reaping the benefits of the streamlined and paperless student registration process powered by Registration Gateway: Compliance. Time and cost savings. Data accuracy. Increased funding opportunities. Simplified downstream reporting and document tracking.

The Registration Gateway Advantage

✔ Provides rapid return on investment

✔ Eliminates paper

✔ Reduces administrative costs

✔ Boosts in process efficiency

✔ Increases in "free and reduced lunch" participants

✔ Reduces legal risk and exposure

✔ Provides disaster recovery and avoidance
