

# Registration Gateway

## Enrollment Simplified

### The Registration Gateway® Difference?

Registration Gateway automates paper enrollment solutions improving the consistency and security of your data through Type Ahead Addresses, Intelligent Field Masks, Simple Workflow, and Advanced Dashboard Tools.

## Dare to Compare.

*Don't be fooled by Enrollment solutions that only go half the distance.*

*Dare to Compare with Registration Gateway®.*

## True Type Ahead Address Entry

Does your existing online or manual enrollment process create more bad data than it corrects?

Let's Compare!

	Registration Gateway	Other
Type Ahead Addresses	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
Intelligent Field Masks	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
Simple Workflow	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>
Advanced Dashboards and Routing	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>

*Registration Gateway offers all customers, at no additional cost, type ahead address validation. This validation process ensures parents enter the correct address everytime leading to much cleaner and more usable data.*

*Other solutions may use a forms based process which simply turns a paper form into an online form with little to no data validation. The caveats to this process are that you would simply be taking an inefficient paper process and migrating that process to an inefficient online process. Registration Gateway offers a true process driven solution that identifies bottlenecks and inefficient processes to be addressed.*

## Intelligent Field Masks

Can your existing online or manual enrollment process identify data that is out of range or irrational which may lead to incorrect state reporting and loss of funding?

## Let's Compare!

*The Registration Gateway Enrollment Solution to the right identifies issues with data entry and prevents the process from moving forward until the data is correct. The flexibility of the Registration Gateway solution shows through in the customization available to the district allowing any number of field dependencies and requirements.*

*“What used to take days now takes a matter of minutes”*

Terms of Use  
Create or Edit My Account  
Pre-Registration  
Logout

\* Student first name  
Michael

Student middle name  
As it appears on birth record

\* Student last name  
Marshall

Suffix  
▼

Name student wishes to be called

\* Date of birth  
01/05/1900

Please use the calendar to choose a valid date or type one in manually.

*Many inefficient forms based enrollment solutions lack the ability to acknowledge specific valid birth date ranges. An erroneous birth date year of 1900 entered into a forms based registration solution would be accepted as valid due to the lack of Field Based Intelligence. Simple, archaic form based enrollment solutions may not employ the intelligence that your district requires.*

Enrollment Simplified

## Simplified Workflows

Simplified workflows should be at the heart of any enrollment solution whether manual or online. Registration Gateway offers one of the easiest to navigate interface while providing users obvious queues to progress to the next stage of the process.

## Let's Compare!

*The Registration Gateway solution on the right provides a simple to navigate review form. Since all required fields must be entered on the prior screens and those entries are automatically formatted and validated, very little action needs to be taken in the review process. Should a parent choose to enter more information, a simple dialog box appears to enter the information. There is no need to revisit the entire process to add more information. Lastly, the Registration Gateway solution provides the ability to register another student and transfer much of the information already entered.*

*Many Forms Based solutions allows parents to submit incomplete data and furthermore requires those errors to only show at the end of the process. Correcting the error is very convoluted as the process takes you through the individual screens in the workflow. Required fields can easily be ignored in this process.*

"Registration Gateway expertly led our transition from a paper-oriented registration system to a digital, online-oriented system, saving our registrars and parents significant time and frustration. Implementation and launch was on-time and seamless. I highly recommend Registration Gateway to any school system thinking about modernizing their registration process."

Brian Brugger, Senior Systems Administrator, Eagle County Schools

# Advanced Dashboards and Routing

Your district registration process should not be a black hole. It should be a process with transparency to all layers of the district. From automatically routing important registration documents to viewing and acting on registration as it happens, the Registration Gateway Solution provides the highest levels of automation and simplification.

## Let's Compare!

Can your registration process do the following:

Proactively alert school medical officials of a new student or existing student registering with a medical condition.

Alert IT staff that a parent has agreed to school technology policies so that a student account can be set up.

Notify Student Services that a newly registered student has existing special needs to be addressed.

*All this and more can be done simply through Registration Gateway workflows.*

“SRC Solutions Advanced Dashboard makes it easy and efficient to get the data that is important to us. This saves us time and provides better reporting functions for our organization!”

Cyle Dibble  
Logansport Community

*No longer does your district need to manually manage the expiration lifecycle of documents such as Court Orders, Medical Clearance, IEPs, 504 Plans and more. With Advanced Routing both your district and your parents will know when any of these documents are set to expire.*
