

NEW DVD SAVES POWER TOOL OWNERS TIME AND MONEY

Photos, Videos, and Instructions Provide Clear, Concise Information

MEDINA, MN (September 3, 2014) - Rockler Woodworking and Hardware has introduced the latest informational DVD release from Woodworker's Journal, entitled "Power Tool Maintenance". This interactive DVD-ROM demonstrates the fundamental setup and maintenance procedures for seven major power tools: the table saw, jointer, drill press, dust collector, air compressor, pneumatic nailer and even a moisture meter. Step-by-step instructions, more than 150 photos and over 60 minutes of video from industry experts make this an indispensable resource to help keep power tools up and running, in turn protecting the monetary investments made in these valuable tools.

"This Power Tool Maintenance DVD contains a great deal of very valuable information," says Woodworker's Journal Publisher Rob Johnstone. "People spend hundreds if not thousands of dollars perfecting their power tool setups. This DVD will help them get the most out of those investments by providing methods to get the best production results and maintenance schedules to keep them working for years."

Once it is inserted into a computer DVD-ROM drive, the Power Tool Maintenance disc is formatted to be searchable so users can quickly find their desired content and perform maintenance on a specific tool. The content provides users with methods to set the tools up, to keep them running at top performance, and also maximize the lifespan of each tool.

The Power Tool Maintenance DVD (56228) retails for \$9.99 and can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler independent resellers, Rockler.com, or from the Rockler catalog. For store locations or a free catalog, please visit www.rockler.com or call 1-877-ROCKLER.
