

Corporate Fact Sheet

SUMMARY	Privately-held Reliant Heart, Inc. is a leading innovator in mechanical circulatory support therapies for patients with advanced stage heart failure, develops and manufactures the HeartAssist5® Ventricular Assist Device (VAD).
PRODUCT	<p>Implanted above the diaphragm and weighing just 3.3 ounces, this next generation device is the world's only remotely monitored VAD. Offering natural human pulse circulation support to the weakened heart, the implantable pump has earned the CE Mark approval for commercial sales in Europe.</p> <p>Unique to the HeartAssist5® is its 24/7 HeartAssistRemote™ Monitoring System which continuously receives and transmits patient data via vadlink.com to expert clinicians. Combined with a proprietary true-flow measurement system, these optimized device features allow for faster and more precise diagnosis of potential issues.</p> <p>An unobtrusive cable connects the lightweight pump to a small, wearable controller and two rechargeable batteries providing patients with full mobility and improved quality of life.</p>
APPROVALS	<p>Europe: The HeartAssist5® has CE Mark approval in Europe for patients awaiting a heart transplant (Bridge to Transplant), and as a Destination Therapy for patients who are not candidates for cardiac transplantation.</p> <p>United States: The HeartAssist5® has been approved by the FDA for a Bridge to Transplant Clinical Trial.</p>
