

Performance Driven Nova Launcher by TeslaCoil Software

Now Available for Intel® Atom™ Tablets for Android*

With hectic schedules and a hectic lifestyle, every minute that can be saved is valuable. Mobile devices are relied upon by their users, and customization is the key to quick and easy use. TeslaCoil Software's popular Nova Launcher app has been recently optimized for Android* tablets. Its home screen replacement ability is the original and most-polished customizable launcher for the modern Android*.

Nova Launcher empowers the replacement of a home screen with one that is easily personalized and fully controlled by the user. Icon themes can be selected from thousands of choices. Color themes can also be chosen, including individual color controls available for labels, folders, unread count badges, drawer tabs, and the background. The home screen can be laid out in a way that makes it simple for a user to quickly access the most-used icons, while hiding infrequently used ones. The infinite scroll feature allows users to never be far from a favorite webpage.

Home Screen Replacement Experience Reaches New Audience on Intel Atom Tablets for Android*

Android* tablets set the perfect stage for optimal use of Nova Launcher. The capable app provides the highest levels of personalization and organization to its users, while easily accessing all options at hand on the well-suited platform. Users can also benefit from security with the backup-restore feature, ensuring all choices in layouts and launcher settings are always secure.

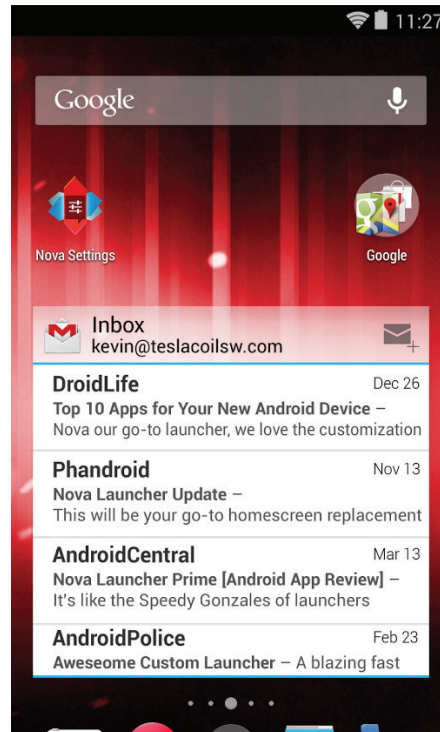

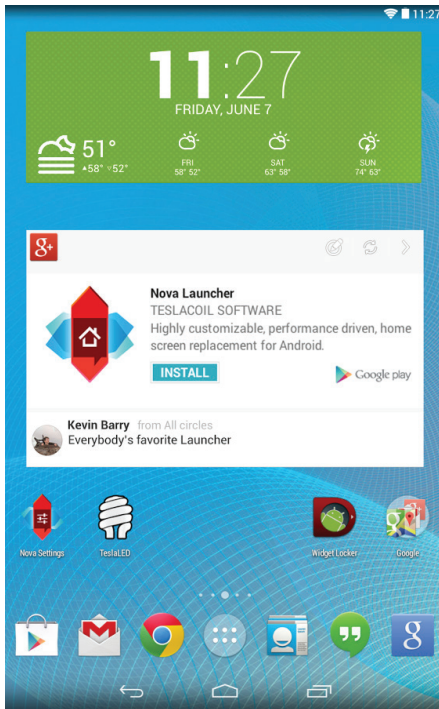

Users can now quickly and easily download Nova Launcher to start the process of customizing home screens to best suit their needs. The flexibility and mobility of Intel Atom tablets for Android* allow users to benefit from and fully appreciate the wide range of options and enhancements available only on devices with such a high-performance platform.
