

RedTail Warehouse Link for AccountMate

Process Automation Advantages

Suppliers need constant improvements in efficiency to keep a competitive edge. That means reducing error rates, speeding order fulfillment and increasing accuracy — all while reducing labor expenses.

Process automation updates systems at electronic speeds and eliminates manual steps where mistakes occur. Order-to-cash cycle times shrink and customer satisfaction improves.

Lower costs and better performance are exactly what you need to stay in front.

Powerful Warehouse Integration

RedTail Warehouse Link integrates your warehouse operations directly with RedTail EDI, providing capabilities for order release management and automated ASN (EDI 856) generation. Warehouse Link affords comprehensive integration with a wide range of pick-pack, shipping, automated data capture (ADC) and warehouse management (WMS) systems.

Released automatically or selectively in Microsoft Dynamics GP, orders are transmitted via Warehouse Link to your WMS or order fulfillment system for picking. When the warehouse software informs Warehouse Link the order has shipped, order and item status are updated in Microsoft Dynamics GP and an ASN (EDI 856) is automatically generated and sent to your trading partner. Carton ID's and contents, SCAC codes and other shipping information are included in the ASN as required for trade compliance.

Available Modules

	Description	Required 3rd-Party Application
Warehouse Link - AutoASN	Generates ASNs from Sales Order header and item quantity information	
Warehouse Link - WorldShip	Generates ASNs using information from UPS World Ship	UPS World Ship
Warehouse Link - Pick-Pack	Bidirectional integration with your pick-pack application	Blue Moon Advanced Fulfillment or other pick/pack application
Warehouse Link - WMS	Comprehensive WMS integration	Accellos One; Kare Visual Warehouse; IRMS; or Manhattan SCALE

Improved Visibility

Beyond document exchange and integration, Warehouse Link adds important order fulfillment and history views into Microsoft Dynamics GP, based on Operations Core from Blue Moon in

- Customer/Order-Specific Fulfillment Instructions
- Customer/Item Picking Instructions
- Customer Ship-to/Bill-to Notes
- Mark-for-Store Labeling Information
- Customer/Item Price Ticket Labeling
- Item/Shipment Searchable Packing Detail
- Shipment Tracking

If you use pick-pack, shipping, ADC or WMS systems, Warehouse Link communicates directly with them so all your critical distribution information is connected and consistent.

Proven Solutions

RedTail Warehouse Link was developed in partnership with Blue Moon Industries, whose warehouse integration technology is widely installed and actively used to integrate Microsoft Dynamics GP with most popular WMS and fulfillment systems. RedTail's EDI expertise and Blue Moon's warehouse integration smarts combined to produce a solution that will get you up and running fast with efficient, effective EDI processes that integrate seamlessly with Microsoft Dynamics GP. If you use a third party logistics provider (3PL), ask about RedTail 3PL Link.

RedTail Solutions— The Power of Comprehensive, Managed EDI Services

RedTail gets you going fast, keeps you running, and scales as you add trading partners and grow your business. Freedom from the complexities of EDI means you concentrate on your business, reduce costs, and increase profits. Leverage your superior EDI capabilities to increase sales. Let RedTail make EDI work for you.

Warehouse Link adds process automation benefits to those inherent in RedTail EDI—the most powerful, scalable managed EDI service available for Microsoft Dynamics GP:

Implement EDI Fast

- No hardware, networks or software to install
- RedTail has established relationships with over 1,200 trading partners in Retail, Grocery, Industrial, Automotive and Pharmaceutical sectors
- Uses proven maps and connections that already handle millions of transactions for customers

Reduce Total Cost of Operation

- No hardware, networks or software to buy, house, operate, power, patch, maintain and upgrade
- Rates go down as usage increases

Invest No Capital

- Pay-per-use service provides complete EDI with no hidden, extra charges
- Preserves your existing investment in Microsoft Dynamics GP

Free Up Resources

- Our team—with hundreds of person-years of EDI experience—is your EDI team
- No staff turnover worries

Trade with Any Partner

- Supports any transaction type, including PO, PO Acknowledgement, ASN, Invoice, Remittance Advice, Credit/Debit Adjustment, Text Message—and hundreds more
- Interoperates with every transaction standard, including ANSI X12, EDIFACT, XML and EAN/UCC
- Communicates using AS2, AS3, FTP, sFTP, HTTPS and VAN network standards

Assure Compliance

- RedTail provisions, maps, and validates all trading partner connections for you
- Experts test and correct any problems before the first live transaction occurs

Improve Scorecards

- RedTail's mastery of intricate trading partner requirements ensures accurate, error-free transaction flow
- RedTail monitors and updates trading partner connections to ensure on-going compliance

Eliminate Chargebacks

- RedTail generates timely ASNs and prints GS1-128 labels, even in high-volume, complex packing operations
- RedTail handles trading partner specific label setup

Speed Order-to-Cash Cycle

- Eliminates manual data entry through RedTail's seamless connection to Microsoft Dynamics GP
- Reduces time and prevents errors

Stay Up and Running Securely

- RedTail is accessible 24 hours a day, every day, from world-class datacenters with reliability better than even the most diligent company can achieve on its own
- RedTail's constant monitoring, error detection and resolution, as well as complete backup and audit trail, ensure that every transaction reaches its destination correctly
