

## TechniBlend Expands Mechanical Engineering & Design Group

Waukesha, WI – September 26<sup>th</sup> 2014 — TechniBlend announced today that it has expanded its Mechanical Engineering & Design Group with the addition of David Peacock.

David Peacock brings a vast knowledge of mechanical engineering and system design experience with him, including comprehensive knowledge and experience with many aspects of process flow engineering, machine and system design, machining and manufacturing best practices, combined with an extensive background in SolidWorks 3D CAD design software.

David commented, “I look forward to being part of the TechniBlend team and utilizing my skills and experience to help deliver great products that make our customers in the food, beverage, distilled spirits, consumer products and chemical industries more successful. I look forward to helping TechniBlend innovate and remain a leader in the industries they serve. I am also impressed by the technology and systems that TechniBlend has already introduced such as the TB-200 series carbonated beverage blender and the many other innovative processing and liquid blending solutions TechniBlend provides to their current and growing customer base.”

"David is a great addition to the TechniBlend engineering team. He brings a wealth of engineering and design experience, combined with analytical mechanical engineering knowledge that will serve our customers well. His intuitive engineering background and skills, which he gained while earning his Mechanical Engineering Degree at The Milwaukee School of Engineering (MSOE) has already made him a valuable asset to TechniBlend.” says Jim Oehmcke, TechniBlend's Director of Process Engineering.

Derek Deubel, TechniBlend President, adds, "The addition of David to our team is a perfect fit for TechniBlend and our customers. He brings a wealth of engineering talent, 3D CAD modeling skills, and innovative manufacturing engineering understanding that adds another dimension to our rapid growth and will help us continue to deliver great products, on time for our customers. We are very glad to welcome David Peacock to the TechniBlend team - our customers will benefit greatly."

### About TechniBlend, Inc.

TechniBlend is a process engineering and automation control company that designs, engineers and manufactures liquid processing systems and solutions for the food, beverage, distilled spirits, personal care, consumer products and chemical industries. Our systems and solutions provide a synergistic blend of innovation, intuitive engineering and advanced technology that allows us to aptly meet the needs of our customers' changing and growing business. Our technological solutions allow for more enhanced efficiency, productivity, sustainability and improved product quality that ensures a large return on our customers' investment.
