

The Resourceful dict.cc+ dictionary App by Paul Hemetsberger

Now Available for Intel® Atom™ Tablets for Android*

Developer Paul Hemetsberger has successfully collaborated with Intel® to optimize the popular dict.cc+ dictionary for Android* tablets powered by Intel® Atom™ Processors. The ad-free app can now deliver its wealth of language-based information to an expanded base of mobile device users in need of some translation assistance from time to time.

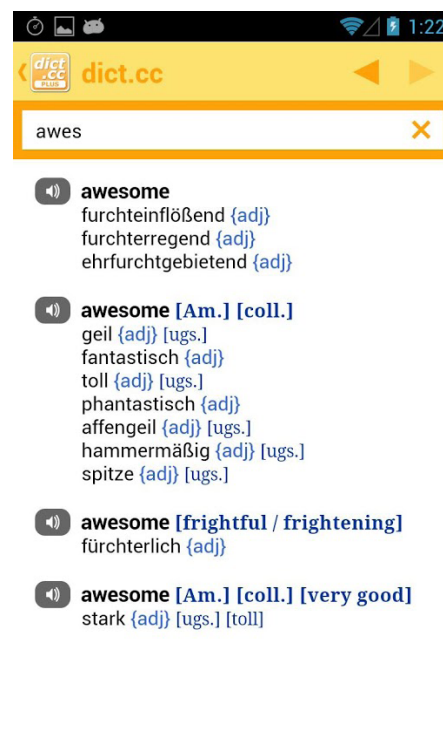

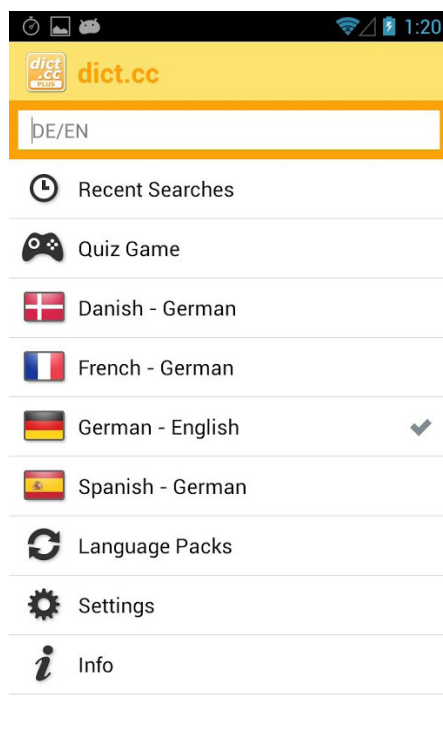

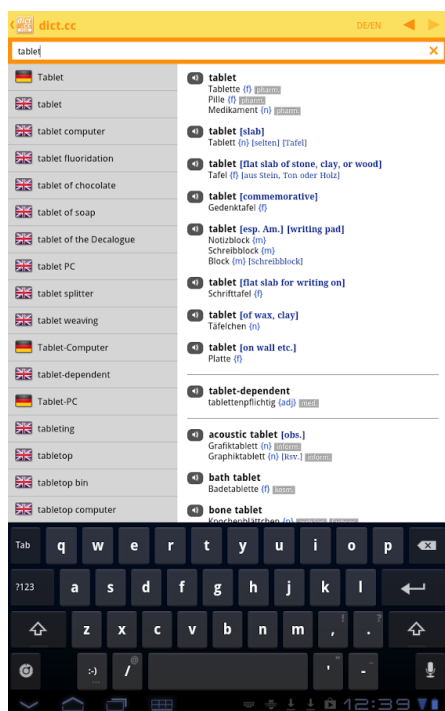

Offering a dictionary containing over 51 language translation combinations, the sky is truly the limit with dict.cc+ dictionary. The German-English dictionary portion alone contains over 960,000 translations. Other languages available include: French, Greek, Russian, Polish, Spanish, Italian, Slovak, and Portuguese. The app's downloadable vocabularies are updated daily. Additional translations and any necessary corrections can also be easily suggested by contributors online. Each translation entry is checked closely, so the dictionary is always up-to-date and dependable. A user's recent searches are remembered, allowing greater ease-of-use. The resource can also be used even without an Internet connection thanks to the offline dictionary feature. Quiz games are available if a user wants to test language knowledge or skills, making the app also fun and educational.
