Vintage-Style Photo App Retrica by Venticake

Now Available for Intel® Atom™ Tablets for Android*

The development team at Venticake has collaborated with Intel® to optimize its creative photography app Retrica for Android* tablets powered by Intel® Atom™ Processors. Users of the device can now implement a world of filter and picture options easily while capturing memorable life moments from just about anywhere.

Retrica offers 80 high-resolution, professionally-designed filters that can be applied before a photo is even taken. The chic and deep filters make pictures pop, and are even usable with photo collages. Time intervals can be set to take consecutive photos with friends. A self-timer is available, as well as a photo booth option with 22 collage layouts. Additional image features include: vignette, out-of-focus blur, and selectable borders. There are also 15 Retrica logo watermarks to choose from, or this option can also be easily turned off all together in the settings.

Real-time Image Options on Android* tablets powered by Intel® Atom™ Processors

Thanks to Retrica, Android* tablets now provide photographers of all skill levels the opportunity to take customized pictures with ease. The device's high-resolution screen allows the available filters and photo effects to come to life. Captured memories of life moments have never been easier to personalize and save.
The Retrica app is easily downloaded so that Android* users can elevate their photography experience into a high-quality and detailed adventure. The wide range of picture options can be fully appreciated only on devices with such a high-performance platform. In addition, the mobility of Android* tablets guarantees that photographers of all ages will enjoy Retrica when taking in a great view during a vacation, enjoying a meal with friends, or capturing a memorable night out on the town.
