

The Life-Like Wrestlers of the Sumotori Dreams App by gravitysensation

Now Available for Intel® Atom™ Tablets for Android*

The realistic physics of the Sumotori Dreams game challenges Android* tablet users to use their virtual skills to conquer their opponents. The mano-y-mano fighting battle by Gravitysensation is now optimized for Intel® Atom™ tablets for Android* and gamers worldwide can test their chops. Based on the real dynamics of gravity and motion, the object of this Sumo-style match is to force the opposite player outside of the circle. Requiring balance, speed and subtlety, the game simulates actual bodies coming into contact.

Crisp graphics, fluid animation and a swiping mobile camera angle give players a range of vantage points. Users can compete against each other or an artificially intelligent opponent. The wildly popular game sharpens technique because the simulation is so true to life. This latest version offers faster responsiveness and five different arenas with obstacles that players must maneuver around.

Sumotori Dreams Now on Conquers on Android* Tablets

The sleek, lightweight design of Android tablets off hours of gameplay so the Sumos can trounce each other from any location. Powered by fast, versatile Intel® Atom™ processors, these devices let the rollicking, high contact sport continue. Excellent high-resolution graphics and sensitive touch screens enable gamers to deftly slam, topple and pummel for some hilariously funny slapstick.

A wider audience of gamers can easily download the hijinks onto their Android* screens. This ancient Japanese sport takes on a notably comic and modern facet with the help of Intel. Gravitysensation has produced an enthusiastic response from the gaming community with this incredibly entertaining activity.
