**immigo**

**NEW: Peregrine brings you Immigo, revolutionary new global immigration case management system software, fully compatible with Immiguru.**

## Immigo offers:

- Secure, backed up system for the management of global immigration case work
- Specific design from global immigration specialists for the management of immigration case work
- Knowledge data (including steps and documents) portable from Immiguru and then editable by user

## With Immigo you can:

- Keep multiple company entity data securely in one system
- Link individual applicants (and their dependents) to companies/entities
- Create and manage multiple cases for each individual applicant
- List all your immigration suppliers in one system and link those suppliers to specific cases
- Create a comprehensive fee library and easily link specific fees to cases
- Build your own report templates and generate your own reports, for example, on expiry dates and key performance metrics
- Give HR contacts, employees/assignees and suppliers limited, secure access to view case status and upload/download documents

## Coming Next:

- Use secure messaging system to communicate with HR, applicants, and suppliers
- Synchronise your emails to Immigo

**Immiguru + Immigo = Case management software with detailed, live country process data**
