printsales@transilwrap.com

Transilwrap's Transalloy® P-300 Multi-Polymer Alloy provides solutions for applications requiring exceptional print quality and greater processing flexibility. This engineered Transalloy® provides higher print performance, UV resistance and increased durability over vinyl and styrene alternatives.

## FEATURES

- High tear resistance
- Excellent impact strength
- Non-PVC product recyclable under Code 6
- Offset litho, UV litho, flexo and digitally printable
- Can be die cut, punched and stapled
- UV resistant
- Available in sheets and rolls in a variety of gauges
- Stock and custom sizes available

**IDEAL FOR:** Signage, posters and displays; shelf danglers, tags, cards, shelf wobblers and strips; loyalty, gift and membership cards; calendars and other point-of-purchase applications
