

Orange Energizing Solutions Reports Strong revenue and Continued Expansion During the Third Quarter of 2014

Orange will further expand into several new locations over the next several months.

October 9, 2014 – New York, NY – Orange Energizing Solutions (Orange) is a leading provider and installer of cost effective energy efficiency solutions for commercial refrigeration business applications, including those in the grocery, restaurants, C-Store, fast food and hotel industries. Products include custom manufactured gaskets, strip curtains, night covers, anti-sweat controllers, door closers, gasket sweepers, handles, latches, hinges and custom door repairs.

Headquartered in New York, NY, Orange is owned and managed by Moshe Schneider and Avner Harel who over their 25 years of combined industry experience have built a reputation for providing quality products, services and end-to-end solutions. As of September 30, 2014 Orange has added offices in upstate New York, Virginia, Michigan, Colorado, Arkansas, Modesto California and Winnipeg, Manitoba Canada. Orange is highly mobile and looking for expansion opportunities in the United States and Canada through participation in energy efficiency programs or serving national or regional chains' retrofit and ongoing maintenance needs.

Revenue for the calendar quarter ended September 30, 2014 was approximately \$1.9 million; bringing the 2014 year-to-date revenue to approximately \$6.7 million. Orange expanded their operations during the third quarter of 2014 into Little Rock Arkansas and Modesto California. CEO Avner Harel commented that "Orange expects to expand operations into three additional states before the end of 2014 and in one additional location in Canada in the next three to four months". He added that "Orange has continued to add additional products such as the sale and installation of LED lighting fixtures for refrigeration and freezer units".

President Moshe Schneider commented that "Orange works with utility companies in the United States and Canada by educating them on the energy savings opportunities their products provide. This result in utilities adding these energy efficiency measures to their rebate and incentive programs. Orange is able to demonstrate their ability to deliver significant customer participation under utility rebate and incentive programs." Schneider added that "Orange, alongside certain utilities and energy efficiency related companies, is conducting studies on certain energy saving measures."

If you are a national, regional or local chain, Orange can be your full service retrofit and maintenance provider and where possible, we will help you obtain rebates and incentives under energy efficiency programs.

Orange provides parts nationally (except Florida), through their website "Oesolutions.net".
