Creative Repix App by Sumsoing

Now Optimized for Intel® Atom™ Processor-based Tablets for Android*

Development company Sumoing has successfully collaborated with Intel® to optimize the inventive Repix app for Android* tablets powered by Intel® Atom™ Processors. The real-time photo editing application is now accessible to an expanded base of mobile device users looking to turn their ordinary photos into saved personal masterpieces.

With 30+ handcrafted effect brushes available, Repix is more than a photo editor. It's an artistic tool where the options are endless, giving users the creative freedom to save captured memories in personalized ways. Users can apply Animated, Decoration, Effect, Color, and Artistic brush options to add unique touches to every photo. A super-smooth cropping tool offers five presets to choose from, and studio-grade technology inspires new levels of creativity. There are 16 carefully designed filters available for use, including amazing spotlight filters, as well as 17 beautiful frames that give photos that finishing touch. A fast and robust adjustments tool consistently brings out the best in photos. Once complete, images can then be saved with direct access to albums, and also shared on any favorite service, including Facebook.
Repix for Android* tablets powered by Intel Atom Processors gives users the creative editing tools they've always wanted. Photographers of all skill levels can easily give their photos a fantastic new look, quickly and effortlessly – and all in real-time.
