tinyCam Monitor PRO for IP Cam by Tiny Solutions LLC

Enabled for Intel® Atom™ Tablets for Android*

Surveillance is a primary form of protection and security; however, it can be costly and complicated. Thankfully, in the digital era, it no longer has to be. The tinyCam Monitor PRO by Tiny Solutions allows easy, versatile monitoring from multiple video sources. Now optimized for Intel® Atom™ Processor-based tablets for Android*, users can actually view these feeds right on their portable devices.

All the major brands of equipment are compatible with this remarkably simple application that features pinch-to-zoom, one or two way audio, and a Pan/Tilt/Zoom option so that cameras can be maneuvered remotely. 14 different layouts enable a large number of feeds to be viewed simultaneously, and SSL encryption protects against third party interference. Footage can be imported and exported to the cloud and the app even supports motion detection with some models of cameras.

## Easy Video Monitoring and Utility on Android* Tablets

The assurance of being able to check in on a sleeping baby, pet or property from a remote location using a mobile device is invaluable. Lightweight, responsive tablets offer hours of performance so that viewing supported surveillance is a snap. The piece of mind that comes with knowing privacy is protected and property is secure reach now that the tinyCam Monitor PRO is downloadable instantly onto the latest Android* devices.
