EFFICIENCY

HOW CAN YOU CONTINUOUSLY IMPROVE ENERGY EFFICIENCY?

ENERGY MANAGEMENT SYSTEMS AUDIT, CERTIFICATION & TRAINING SERVICES

SGS

ISO 50001:2011 Energy Management Systems certifications enable you to demonstrate your commitment to treating the environment responsibly, ensuring energy efficiency across all your activities. By having effective energy and environmental management systems you can give your stakeholders the assurances they demand.

ISO 50001:2011 specifies the requirements for an organisation to establish, implement, maintain and improve energy management systems (EnMS). ISO 50001 is a voluntary standard that applies to all aspects of an organisation's energy use.

THE BENEFITS

By establishing the systems and processes necessary to improve energy performance, including energy efficiency, use, consumption and intensity, you can reduce your energy costs, GHG emissions and other environmental impacts. SGS certification enables you to take a systematic approach to continual improvement of energy performance and emission control, and shows your commitment to effective energy and environmental management systems.

Improved energy performance provides rapid benefits for an organisation by

maximising the use of energy sources and energy related assets at the same time as reducing both energy costs and consumption.

HOW THE CERTIFICATION PROCESS WORKS

- Step A – Tailored proposal from SGS.
- Step B – Optional 'pre-audit' of readiness and weaknesses.
- Step C – Formal audit 'Stage 1 – Readiness Review'. Documents and other key system elements are evaluated and non-compliances reported.
- Step D – 'Stage 2': interviews, examination of records and observation of working practices. Non-conformances are addressed.
- Step E – Surveillance visits to check the system and action plan implementation.
- Step F – Re-certification audit after three years.

RELATED SERVICES

Our ISO 50001:2011 training covers all levels of ability and awareness and includes:

- Energy Management Systems Foundation Training Course
- ISO 50001 Lead Auditor Course

Please view the training course schedule at www.sgs.co.uk/training

WHY SGS?

SGS is the world's leading inspection, verification, testing and certification company. SGS is recognised as the global benchmark for quality and integrity. With more than 75 000 employees, SGS operates a network of over 1 500 offices and laboratories around the world.

Enhancing processes, systems and skills is fundamental to your ongoing success and sustained growth. We enable you to continuously improve, transforming your services and value chain by increasing performance, managing risks, better meeting stakeholder requirements and managing sustainability.

With a global presence, we have a history of successfully executing large-scale, complex international projects. Our people speak the language and understand the culture of the local market and operate globally in a consistent, reliable and effective manner.
