New Year...New Career...Give a Gift Campaign!

Specifically designed for individuals looking to make a career transition or launch a new career in the exciting field of healthcare!

The New Year...New Career...Give a Gift Campaign is specifically designed for those individuals who are interested in launching a new career in medical transcription, medical billing, medical coding, or as a medical scribe but are not ready to make the full financial or time commitment necessary to move forward with the necessary training without trying it out first. For a small investment of \$249, an individual can give themselves the gift of a new career; or a parent, guardian, or other sponsor may provide this opportunity to their son or daughter, spouse, or anyone they choose. By leveraging AHDPG's New Year...New Career...Give a Gift program the recipient can learn first-hand whether or not their chosen field of study is best for them.

The online training programs included in the New Year...New Career...Give a Gift Campaign are as follows:

- ❖ **Medical Transcription Editing**
- ❖ **Inpatient Medical Coding (ICD-9/ICD-10)**
- ❖ **Outpatient Medical Coding (ICD-9/ICD-10)**
- ❖ **Medical Billing and Reimbursement**
- ❖ **Medical Scribe Specialist or Clinical Information Manager**

[For more information on these training programs click here.](#)

Students who enroll in this program will receive full access to the program of their choice for 60 days along with all of the textbooks and materials needed to successfully complete module 1 of the program. Module 1 in all programs is designed to be completed in 45 to 60 days depending upon how much time a student allocates to their studies. Some students might complete the module in less than 60 days; some might need more than 60 days, but everyone who enrolls will gain the first-hand knowledge necessary to determine whether or not their chosen field of study is best for them. Certain terms and conditions apply.
