ABOUT US

Hidden Brains is a leading global provider of technology services for enterprises. Our continuous endeavor in the field of IT, has given us recognition as the 168th fastest growing Company by Deloitte Technology fast 500 Asia Pacific.

We create seamless business processes for our clientele at Hidden Brains by leveraging innovative technologies that besides providing holistic experience help maximize ROI for businesses. Over the years, we've expanded our verticals to various technology platforms to address complex business challenges across sophisticated industry domains like eLearning, security, healthcare, retail, oil and gas.

Our proven expertise in the field of technology, active business engagement and higher standards of governance keep us ahead of competition. We are committed to DELIVER 'Excellence in Services' for our clientele without compromising on Quality.

ENTERPRISE SERVICES

Building Mobile
Enterprises of the Future

Hidden Brains offers a wide range of end-to-end IT consulting services for medium to large enterprises. Our robust proven methodologies and industry best practices help address the biggest problems faced by businesses today by reducing process bottlenecks; and creating accelerators along with viable technology solutions.

Business Intelligence and Analytics

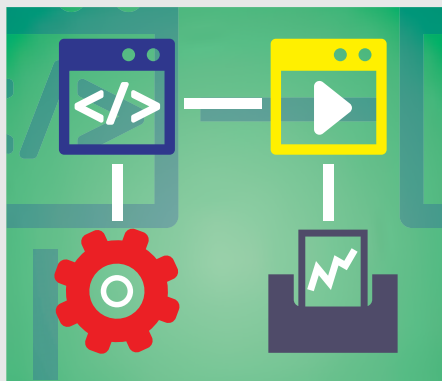

The ability to collect and analyze internal and external data can dictate how well an organization can generate knowledge and ultimately value. To extract information from huge, ever-growing databases and then turning it into actionable business intelligence at the time it's needed, puts enormous strain on traditional data management systems.

Hidden Brains offers a comprehensive set of Business Intelligence services to help clients harness structured data to improve decision-making, financial management, regulatory compliance and customer service. Our solution architects help create a blueprint tailored to the unique technical and business requirements of Organizations and ensure end-to-end implementations in Data & Analytics.

Enterprise Mobility Services

Enterprise Mobility is universally accepted as one of the most disruptive technology ever. Enterprise mobility taps new revenue streams, improves productivity, promotes brand building, and brings complex systems on finger tips that too using "bring your own device" BYOD policy.

As the fine line between Enterprises and Consumer gradually blurs in terms of adoption of technologies; Companies are increasingly forced to revamp their business processes based on the concept of mobility. This involves technologies such as cloud and analytics, using context-driven and location-aware data to influence the way Companies function.

Enterprise Application Services

With increasing customer demand for innovation and rapid change in market, there is a huge demand to exchange data with other systems on public cloud, private cloud, traditional systems and other third-party ecosystems. Hidden Brains helps enterprises in making highly secure and robust applications that sync with their respective business process and reflect the work environment.

Hidden Brains proven expertise in Enterprise Application road map include: Performance Management, Proof of Concept (POC), Product evaluation and Entire Application road map – Conception, Design, Development, Testing, Deployment, Maintenance and Support.

Enterprise Collaboration Services

Interoperability of the systems increases the operational efficiency of any enterprise; however, it is a major constraint in the current industry. Hidden Brains Enterprise Services helps you overcome the interoperability constrain by- Optimizing processes, Quick turnaround time from consultation to execution, Strong partnership and alliances, Leveraging emerging opportunities, Customization of the applications, Integration with third party applications.

Hidden Brains set of services in Enterprise Collaboration Services includes Enterprise Content Management Systems, Share Point services, Enterprise Social Analytics and Collaborations, User experience & Interface services, Enterprise Search Solutions and Customization.

INDUSTRY WE SERVE

Hidden Brains team comprises of some of the best experts in the technology domain and industry specialists who help us address unique business challenges for enterprises and offer a complete range of enterprise IT services to more than 31 industry domains worldwide. We also PARTNER with industry leaders to provide the most relevant and cost effective technological solutions & services to our clientele.

Travel, Transportation & Hospitality

The end customer for travel, transportation and hospitality businesses expect an engaging experience and speedy delivery of personalized data across channels. The advancement in recent technologies such as NFC (Near Field Communication) based payments, Voice enabled search, Mobile platform adoption, BigData in travel, evolving game changing social media platforms, etc. offer great opportunities for the service provider companies. Hidden Brains offers a wide range of technology services designed to address key challenges in Transportation and Hospitality industry and various sub-segments.

Energy & Utilities

Hidden Brains focuses in smarter energy capabilities in order to improve reliability, efficiency, better customer engagement and cost reduction. We also help enterprises manage distributed energy resources, and transform operations in order to deliver superior customer services by leveraging data and insights. Our deep industry knowledge in Smart Grid communications, Smart metering solutions help develop a platform that addresses bottle necks in the industry like customer acquisition, billing, payment, collections, service orders, inquiries and complaints.

Oil & Gas

Hidden Brains help customers optimize their Oil and Gas operations and ensure the most efficient use of capital and resources. Hidden Brains team of expert, domain-oriented core pool engineers designed the world's best Seismic Visualizer to view seismic data sets. Having worked with leading oil & gas companies, we understand challenges faced by this industry, and help deliver effective enterprise solutions for them.

Internet of Things (IoT)

Internet of Things (IoT) is not just an industry buzzword, but a reality now with enterprises giving a serious thought in its potential. While IoT interprets the innovative technology where the number of devices connected to the Internet is directly proportional to generation of data-driven intelligence from connected thing; the organization's ability to send, receive, gather, analyze and respond to events from any connected device increases. This in turn optimizes business process and automates operations. Hidden Brains offers M2M/IoT services range from cloud enablement, mobility enablement, engineering and real-time analytics, and consulting to deliver end-to-end solutions.

Supply Chain Management

Hidden Brains is a leading global provider of innovative supply chain, retail, merchandising, store operations and omni-channel commerce solutions. We help combine the best-in-class solutions with industry-specific functionalities, giving our clientele the opportunity to independently execute supply chain strategies so as to harness effective results that yields more profit and agility in the business.

Healthcare

Healthcare industry has been facing dramatic changes in customer behavior, market dynamics and regulatory demands. Hidden Brains works with hospitals and healthcare companies focusing on health information exchange and build business solutions to deliver better value for stakeholders. This besides fuelling innovation helps reduce cost, promotes consumerization, and helps sustain cost pressure and complexity of operating systems.
