Pixelization**

Unlike conventional systems that require special hardware at each end, are limited to specific point-to-point communication processing, or require client software downloads, RMT's iMedHD™ Teleultrasound System requires only the secure compact iMedHD™ package and Internet connectivity. This highly secure offering, with both image and video capture capabilities and accompanying audio, is the ideal solution for real-time Internet sharing and collaboration of true live high definition images.

Forget about the limitations and cost burdens associated with conventional products. RMT's iMedHD™ Teleultrasound System:

- Enables medical clinicians to use live 1080p HD imaging.
- Enables medical clinicians to use live high resolution images of existing equipment.
- All that is needed is any PC or MAC web browser and a broadband Internet connection. No need for special hardware or software.
- Incredibly intuitive and easy to use, even for first-time users ~ No manual is necessary.
- Multiple clinicians can easily communicate ~ All participants have shared pointing and annotation abilities.
- Optional Voice over IP, document presentation and desktop sharing capabilities.
- Dynamic browser control for an excellent live HD viewing experience — All can easily adjust image display, view live snapshots and video with complete audio.
- Allows immediate informed diagnoses and decision-making when time is of the essence. With RMT's phone-home capability the solution can be easily moved to any location for flexible use and provides significant cost benefits.

Schedule an on-line demonstration and see how Remote Medical Technologies advancements of the iMedHD Teleultrasound features can benefit your facility. Simply contact us at info@rmtcentral.com or call us at 855-867-3040.
