

Proxios Desktop as a Service - All About End-User Experience

Innovative, no-hassle application hosting provides fast access to the cloud

Why IT Customers Care:

- Higher availability, centralized data management, application licensing, up-to-date compliance
- Reduces IT OPEX and CAPEX, and saves on IT expense and management overhead, while increasing data availability and overall productivity
- Desktops and applications are easier to deploy and can have better performance
- New users can set up in minutes, not days

How End-Users Benefit:

- Access any application on any device, from anywhere
- Hassle-free desktop management with one call to action support
- Work more productively with access to application updates as they happen

Did you know that Proxios is the first cloud provider in the U.S. to be certified on Cisco DaaS with Citrix?

Proxios is certified to deliver services for proven, Cisco-validated architectures and has met the strict qualifications for delivering Cisco Powered services.

Proxios Desktop as a Service is all about the end-user experience. We believe in making it easier for our customers to access data and work in the cloud without the hassle of IT issues. We lead the innovation by working with the best in the industry to offer a complete DaaS solution built on VMware, Cisco, and Citrix that drives customer applications, content, and data to any device, anytime, anywhere.

Proxios hosts Microsoft Windows or Linux-based applications on its enterprise-class cloud platform, on a monthly subscription basis. In addition to customer furnished software, Proxios also provides subscription licensing for Microsoft, Intuit, and other popular third-party application providers. In all cases, applications are delivered to your PC or laptop virtually, giving you constant access to your entire software library. For mid to larger clients, Proxios features its Business Builder solution and for smaller firms with minimal computing needs, Office Builder is the appropriate choice.

Proxios Delivers Best of Breed DaaS - Partnerships with Industry Leaders Drive Top-Notch Results

With support for leading Hosted Virtual Desktops solutions, Proxios is the clear choice for scalable and secure high performance virtual desktops.

- Offers the most comprehensive set of application security, acceleration, and load balancing (including GSLB) capabilities across the broadest range of platforms.
- VCE Vblock Systems and EMC XtremIO support higher performance with a consistent user experience.
- Cisco DaaS certification validates that Proxios is committed to innovation of the cloud.
