# About Infor

Infor™ is the world's third-largest supplier of enterprise applications and services, helping more than 70,000 large and mid-size companies improve operations and drive growth across numerous industry sectors.

Infor combines focused, hands-on industry experience with global breadth to help companies deal with today's challenges and prepare for tomorrow's opportunities.

We offer deep industry-specific applications and suites that are engineered for speed and use groundbreaking technology to deliver a rich user experience. Our applications also feature flexible deployment options that allow customers to run their businesses in the cloud, on-premise, or both.

Infor—redefining business software

Infor products mark the debut of an entirely new category of business software, conceived from today's flexible open standards and delivered through an agile, unbreakable architecture that gives customers the speed, freedom, and power they've always wanted—but couldn't get until now.

With the Infor suite, we're reimagining business software to change the way work is done in the industries we serve. We're building industry suites that deliver maximum value quickly, with features tailored to the specific needs of each industry. By creating revolutionary lightweight middleware technology, and new ways to implement and integrate business software, Infor helps companies leap over traditional application boundaries to improve performance and streamline workflow.
