Company Summary

Law Enforcement Intelligent Devices (LEID Products), LLC is the leader of electronic locker, cabinet, and gun rack storage systems with built-in asset management and inventory control software. LEID offers storage systems with varying degrees of security ranging from a patented Biometric Access Control System ('BACS') to the 'Access.it' System utilizing keypad and/or card reader for access verification. LEID's storage systems allow for restricted authorized self-service pick-up and drop-off of items with electronic chain of custody reporting, controlled 24/7 through remote, web based management and monitoring software. Pass-thru and non pass-thru electronic cabinets/lockers are available in multiple size and configuration options. The BACS and Access.it Systems are proven inventory control and asset management systems used to secure and track critical inventory including; weapons, evidence, medical supplies, corporate development materials, library holds and more.

Core Competencies

- In house engineering staff develops all software and access control technology including validation and testing
- Control systems integration expertise for various technologies - Biometrics, Keypad, Card Readers, RFID, Barcode
- Made in America
- **Cabinets/Lockers** – High quality all steel construction, 16-GA sides, shelves and frame, 20-GA wireways, top and back, Welded frame with riveted assembly, electronic rotary latch locks on doors, Spring-loaded front doors automatically open when unit is accessed, manual override on doors, optional rear door for pass-through installation
- **Access Control Options** – Biometric, keypad, and/or Card Reader

Differentiators

- Customer service and warranty calls and issues handled by engineering staff in Michigan Headquarters
