PROVEN PERFORMANCE  
INDEPENDENT AUDITS  
TRANSPARENT RESULTS

Net Zero Energy is quickly becoming a sought after goal for many buildings around the globe - each relies on exceptional energy conservation and then on-site renewables to meet all of its heating, cooling and electricity needs. Yet the true performance of many projects is overstated - and actual Net Zero Energy buildings are still rare.

Net Zero Energy Building Certification is a new program operated by the International Living Future Institute using the structure of the Living Building Challenge - the world's most rigorous and progressive green building program. Certification is simple, cost effective and critical for integrity and transparency.
