

Traffic Racer Game App by skgames Defies the Rules of Street Racing

Now Enabled for Android* Tablets Powered by Intel® Atom™ Processors

Fasten your seatbelts. There is no track, there is no speed limit, with Traffic Racer by skgames, the driver makes the rules. Newly enabled for Intel® Atom™ Processor-based tablets for Android*, this next-level, heart-pumping action is surefire adrenaline.

Drivers select from over 27 top-of-the-line racing machines, each with their own stats, customizable paint job and wheels. With five modes including Endless, Two-Way, Time Trial, Police Chase and Free Ride, players can take their street-wise skills to the absolute limit in broad daylight, or nighttime. Avoiding SUVs, buses and trucks takes serious skill behind the wheel that earn players big bonus points and street cred. Expert and high-risk moves earn players extra points, and online leaderboard and achievements let drivers compare their moxie with other players around the globe. Flashy, eye-catching graphics, slick animation and realistic physics make for a sensational, high-octane experience.

Lean into the Curves, with Tablets

The app utilizes all the remarkable capabilities of the latest tablets' smooth touch and tilt capabilities. Dynamic virtual driving just took a turn for the better with these powerful, lightweight mobile devices. Whether going for a joyride or evading aggressive virtual cops, the speed and agility of these street racers leaves competition in the dust. Now gamers all over the world can partake in the electrifying action of Traffic Racer.

Features of Traffic Racer on Intel Atom Processor-based Tablets for Android*
