

Job Title: Control Systems Engineer
Job Type: Full Time
Location: Monroe, NC

Spiroflow Automation Solutions, Inc. is a Spiroflow Systems company. With 40 years of control system project delivery expertise in the material handling industry, Spiroflow Automation Solutions provides complete automation solutions across multiple industries.

We currently have an opportunity for a Control Systems Engineer at our corporate headquarters in Monroe, NC. Our employees earn competitive salaries and enjoy a comprehensive benefits package including medical, dental, vision coverage, life insurance, generous vacation days and a 401(k) plan.

Responsibilities:

The Control Systems Engineer will be responsible for the delivery of a wide variety of project scope items and deliverables in custom automation solutions across a wide variety of industries. Responsibilities will typically include scope and system design and development, control system integration and programming, testing and delivery to our clients. Our projects will include Project Development Consulting, Front End Engineering Design (FEED), Detailed Engineering, Commissioning and Start Up, and technical field support.

Requirements:

- Demonstrated experience working on multi-discipline project teams utilizing project management tools and systems.
- Background in multiple control system platforms, Human Machine Interface (HMI) technologies, and integration services.
- Bachelor of Science degree in Engineering. Mechanical, Electrical or Chemical Engineering preferred.
- Experience in project controls and reporting technologies.
- Must be willing to travel to project location for field commissioning and start-up.
- Some hands-on field experience in control systems is a plus.
- Professional Engineering License is a plus.

Experience: 3+ years
