Selected as one of the CMS Designated Test EHR

As part of meaningful use Stage 2's transition of care objective, measure #3 requires eligible professionals (EPs) and eligible hospitals/critical access hospitals (CAHs) to conduct one or more successful tests with the CMS designated test EHR during the EHR reporting period as one of the options. EPs and eligible hospitals/CAHs would be able to use iPatientCare EHR as one of the CMS Designated Test EHR, if matched by the National Institute of Standards and Technology (NIST) hosted "EHR Randomizer" software system.
