Icynene honored with 2014 Architectural Record Product Award

High R-value closed-cell Icynene ProSeal™ wins product award from Architectural Record magazine.

Mississauga, ON. 23 December 2014. Product innovation by Icynene continues to be recognized by peers as the leading spray foam insulation manufacturer receives the 2014 Products Award for Icynene ProSeal™ from industry publication Architectural Record in the Façades category this month.

Icynene ProSeal™ offers an exceptionally high R-value of R7 per inch and is approved for commercial construction types I-V. The spray foam insulation product's all-season formulation allows for a higher initial pass of 3" achieving an R-value of R21.

A jury panel of six industry professionals assessed and selected the best new products of the year from more than 500 entries. Each submission was evaluated based on the criteria of innovation, usefulness, and - where applicable - aesthetics.

"Icynene's product innovation and development continues to resonate with the building industry. No other spray foam manufacturer matches our drive in developing functional, high-performance spray foam insulation products and we are thrilled that Icynene ProSeal has been recognized by Architectural Record. It is honor to have received this recognition from our peers within the industry," said Icynene VP Marketing, Betsy Cosper.

The recognition from Architectural Record follows Icynene's recent 2014 Product Innovation Award from industry publication Architectural Products in the Thermal/Moisture Protection category for its Icynene ProSeal Eco™ insulation product.
