SmarterApps LTD Introduces the Added Customization with AutomateIt Pro

Now Enabled for Intel® Atom™ Processor-based Tablets for Android*

Don't you wish your mobile device understood your schedule, routine and priorities? Well, now it can. The AutomateIt Pro application by SmarterApps LTD can help to arrange life's details for users so that subtle but important tasks are attuned to their needs. Recently enabled for Android* tablets powered by Intel® Atom™ Processors, this incredibly handy app can organize and automate preferences for tablet users.

A remarkably simple interface allows users to create Rules, a defined category of automated tasks they can easily activate or deactivate. For example, choosing the maximum volume in the headphones, or volume on calls based on a proximity sensor is effortless with this neat system. At nighttime, users can select silence for their off-duty hours, or instruct the tablets to conserve power when the battery is low. All the settings that create an enhanced smart device experience fall under one umbrella with this efficient and easy-to-use application.

## A Personalized, Automated Tablet with the AutomateIt Pro

Now, the advanced technology of mobile devices gain the next level of efficiency and customization with this elegantly simple app. The lightweight, sleek design and powerful responsiveness combines with the added control over personal preferences to make these tablets an even more intuitive tool.

Features of AutomateIt Pro for Intel Atom Processor-based Tablets for Android*

- Customizable Features Combined into Composite Triggers
- Enhanced Volume Settings with Proximity Sensor
- Sets up Active Periods for Each Rule
- Monitor Calendar Events

Extend Control Over Tablet Features with AutomateIt Pro

Users can personalize the extensive functionality of their Android* tablets powered by Intel Atom Processors with this versatile application. By downloading it instantly, they can achieve the next level of efficiency and control to suit their lifestyle.

AutomateIt Pro is available for immediate download at Google Play:
