

China Wholesale Phone Manufacturers Caters to Higher Demand for 4G Cell Phones

Chinavasion reports a growing demand for 4G cell phones that are ready for faster Internet. While mainstream brands have been offering 4G mobile phones at premium prices, Chinese manufacturers are catching up with affordable price tags.

The world of mobile data communication has been gearing up for 4G over the past few years now, all the early indicators suggest cellular download speeds of over 400mbps will be available in the not too distant future.

In order to access these networks customers would need to have a smart phone capable of supporting the new 4G bandwidths. As the popularity of 4G steadily grows, Chinese manufacturers are releasing phone models with 4G capabilities.

PR Manager at Chinavasion Ms. Rose Li said, "Chinavasion sells 4G [Android phones](#) starting from as little as \$100 all the way up to \$400 for state of the art devices, which can rival and even out shine many of the latest big brand phones."

Ms Li. added, "When these are compared against established high street branded phones that typically retail at high prices there are significant savings to be made by purchasing from the manufacturers."

Mobile wireless service providers spent millions when bidding for the 4G bandwidths and are heavily invested in the new technology. Rose Li says, "This has resulted in many providers becoming eager to recuperate those costs from the customers so they don't always offer competitive deals for phones and services."

Rose Li states that "Many customers can now acquire a 4G phone at lower prices and use this to their advantage when looking for and negotiating phone plans as they have a wider range of suppliers to choose from."

There could also be other benefits of buying and owning a Chinese 4G phone. According to Chinavasion purchasing a [4G phone](#) directly from China can have major benefits. Customers are not committed to long-term contracts and thus will not face high early termination fees for changing providers. Moreover, MS. Li says, "Customers who travel out of state or to another

country can use a pay as you go SIM to avoid astronomical roaming fees that are often hidden in contracts.”

[China wholesale](#) company Chinavasion, sell Chinese manufactured phones and other electronics with a 12 month warranty on all products and can ship around the globe with express worldwide delivery.
