

Monsanto Selects Innovative Mobile SaaS Solutions Provider nuVizz, Inc. (link to web) to Improve Business Processes

As part of Monsanto's efforts to improve operational efficiencies, elevate the experience of its customers and reduce waste, the company sought to overhaul its existing paper-based delivery-tracking processes. After a 6-month search and evaluation of several vendors, Monsanto recognized nuVizz as the ideal partner to help it reach its goals and entered into a multi-phase project partnership, and a multi-year SaaS agreement.

DeliverIt by nuVizz™ (link to DeliverIt page) is a smartphone-powered shipment execution and tracking solution that will provide Monsanto with real-time visibility of US-branded seed customer deliveries, electronic replacement of paper processes, real-time proof of delivery, and a sustainable model for document storage. It will also collect real-time customer feedback, which will provide the opportunity for timely problem resolution, thus increasing the ease of doing business for its customers.

About Monsanto Company

Monsanto is committed to bringing a broad range of solutions to help nourish our growing world. It produces seeds for fruits, vegetables and key crops – such as corn, soybeans, and cotton – that help farmers have better harvests while using water and other important resources more efficiently. Monsanto works to find sustainable solutions for soil health, help farmers use data to improve farming practices and conserve natural resources, and provide crop protection products to minimize damage from pests and disease. Through programs and partnerships, Monsanto collaborates with farmers, researchers, nonprofit organizations, universities and others to help tackle some of the world's biggest challenges. To learn more about Monsanto, our commitments and our more than 20,000 dedicated employees, please visit: discover.monsanto.com and monsanto.com.

DeliverIt Key Benefits

DeliverIt, built on nuVizz Enterprise Mobile Solutions Platform, provides tracking and tracing of your delivery personnel, whether its truckers or couriers. Get real time feed on the location of your assets on the DeliverIt mapping dashboard and status of deliveries.

Robust Portal:

You now have access to a single portal to track and trace deliveries. Provide your carriers and business partners the capability to track their deliveries and view proof of delivery instantly.

Improve Customer Service:

Provide e mail notifications to your customers when the shipment is close to arrival. Automatically fax or email shipping documents to your customers after acceptance of ePOD (electronic Proof of Delivery)

Improve Dispatcher Efficiency:

Cut-down on the phone calls and confirmations. DeliverIt app performs this process seamlessly with driver acceptance a breeze.

Real-Time Information Feed:

All this seamless technology means that you get real-time information on the loads, shipments, deliveries, proof of deliveries (ePOD) and fleet status – which means a faster more nimble transportation execution.

Low Cost of Ownership:

Achieve all this with the lowest cost technology. Our powerful mobile platform combines the simplicity of smartphones with the capability of a rich and robust mobile solutions platform to provide a feature rich and low cost deployment.
