VenaCLOUD™

REVOLUTIONIZING HOW CORPORATE PERFORMANCE MANAGEMENT IS DELIVERED

The widespread demand for and adoption of cloud-based solutions has been steadily growing for years. Today, we have reached a tipping point where organizations of all sizes and industries are embracing the cloud to keep pace with the speed of business and guarantee an optimal user experience.

HOW YOU BENEFIT FROM THE MANY ADVANTAGES OF CLOUD COMPUTING

OPTIMAL USER EXPERIENCE AND AUTOMATIC ENHANCEMENTS BOOST YOUR EFFICIENCY

Updates in the cloud are automatic, which means you and your team are always using the current version of data, plans, reports, etc.

New product features, software optimizations and security updates are immediately and seamlessly available without IT intervention. This translates to no downtime, while product enhancements boost user productivity.

Vena is stable and resilient. Unlike traditional onsite deployments where a vendor cannot fully anticipate the technical environment or how the software will perform, cloud-based applications like Vena are designed, built and tested on the actual infrastructure that will be used in production. Because we have control over the infrastructure, we can provide the best user experience possible.

HIGHER PERFORMANCE AND FASTER RESULTS LEAD TO IMPROVED PRODUCTIVITY

Extensive high-speed networks support your application every hour of every day.

You are always up and on – but you're not alone. An experienced, dedicated team continuously monitors and tunes Vena for optimal performance. You benefit from the proactive resolution to any issue without having to involve IT.

Additionally, elastic scalability allows you to seamlessly handle changing business demands (e.g., number of users, data usage and processing requirements).

Cloud solutions offer many concrete benefits such as a superior user experience, more stable and manageable costs and ultimately, higher productivity for your organization.

The Vena Cloud™ platform fully leverages the power of cloud computing to provide the most scalable, flexible, enterprise-class corporate performance management (CPM) solution available today.

Vena™

LOWER, MORE PREDICTABLE COSTS ENABLE BETTER PLANNING WITH NO SURPRISES

Working in the cloud means you don't need to plan for capital expenditures on infrastructure and hardware, server setup, configuration or maintenance. Never wait for servers or infrastructure setup again – with Vena, you're up and running immediately.

Vena's subscription licensing allows you to more predictably manage your ongoing costs, with no surprises.

You don't need to rely on IT teams to manage and maintain the application. You retain full ownership and control.

SECURITY AND RELIABILITY GIVE YOU PEACE OF MIND

Vena is architected with features that provide bullet-proof security, high scalability and reliability. Because we've gone to great lengths to take care of security, you have a lot less to worry about.

SYSTEMS

- ✓ High availability with a 99.95% uptime guarantee
- ✓ Highly redundant global infrastructure
- ✓ Extensive vulnerability and penetration testing
- ✓ 24 x 7 x 365 monitoring

SECURE ARCHITECTURE

- ✓ Secure data encryption (Hardware-accelerated AES-256 and SSL)
- ✓ SAML single-sign-on and IP restricting
- ✓ Customer isolation ensures that every customer is running on their own individual database and that customer information is never shared across the same database
- ✓ Multi-factor authentication ensures only those permitted access to Vena are able to log in after a two-step verification process

LOWER OPERATIONAL BURDEN

- ✓ Automatic data backups reduce the need for complex disaster recovery plans

As a Vena client, if you have new feature ideas for our product, we would love to hear them. Vena Cloud provides a unique channel for our clients to suggest new features, view other client feature requests and vote. Our product continuously evolves as a result of feedback from our client base.

ABOUT VENA

Vena Solutions has redefined how companies automate their most mission-critical finance, accounting and business processes. Our platform embraces the best of Microsoft® Excel®, extending and evolving its capabilities to create a next-generation enterprise solution that is powerful, yet intuitive. Vena is a first-to-market solution that offers the most comprehensive suite of cloud-based corporate performance management (CPM) capabilities with a quick deployment methodology – all without compromising what you love best about Excel.
