

Code Red Joins the MaaS360 WorkPlace Partner Program

Delivers Code Red RMS™ iOS application for MaaS360 users

BOSTON, MA, JANUARY 30, 2015 – Code Red, today announced that it has joined the [MaaS360 WorkPlace Partner Program](#). [Code Red RMS MaaS360 Edition](#) will now be featured in the [MaaS360 Market](#), and will leverage the MaaS360 WorkPlace SDK to enable enterprise-grade security controls for protection of corporate data.

Code Red is committed to supporting clients' BYOD programs with secure mobile options. The Code Red RMS iOS app allows users to access and create research on the go. The app's user friendly capabilities (e.g. scrolling research feed, image capture from the Apple® camera app, and document importing from other iOS apps) make for quick and easy offline research entry.

Mobile apps combined with the MaaS360 WorkPlace SDK provide enhanced security through features such as:

- Authentication and access control
- Data leak prevention (DLP) policies to restrict copy-paste, and allow open-in to whitelisted apps
- Blocking app usage for non-compliant devices
- Selectively wiping an app if a mobile device is lost, stolen or compromised
- Encrypt and protect data at rest and in transit

With the proliferation of the Bring Your Own Device (BYOD) trend, organizations want to enable employee choice while protecting company information. Best-of-breed apps are now showcased on the MaaS360 Market and can be made available to enterprises looking to enhance productivity and collaboration between their employees, while securing corporate data.

“The MaaS360 Market and WorkPlace SDK continue to play an increasingly important role with our customers looking to secure corporate data on mobile devices,” said Anar Taori, senior director of product management at Fiberlink. “Code Red can now be integrated with MaaS360 to enable user productivity while meeting strict security requirements.”

About Code Red, Inc.

Code Red, a global provider of investment research technology, enables firms to efficiently organize methods of research and contact management, data aggregation, due diligence, and compliance into an enterprise workspace that models a complete and repeatable investment process around proprietary workflows. The Code Red RMS is implemented at asset management firms, consulting firms, endowments, foundations, fund of funds, hedge funds, insurance companies, mutual funds, pension funds, private equity firms, and sovereign wealth funds. Code Red was established in 2004 in Boston, MA and

has corporate offices in Hong Kong, London, New York, and San Francisco. For more information, contact Jaime Bean at (212) 867 6364 or visit www.coderedinc.com.
