

ROCKLER'S NEW SMALL PIECE HOLDER: A SECURE WAY TO HANDLE SMALL PROJECTS

MEDINA, MN (January 29, 2015) - Rockler Woodworking and Hardware has introduced the Small Piece Holder, a clamping device designed to confidently hold small project pieces when machining on a router table. Projects such as toys, plaques, and birdhouses often involve small pieces that require edge treatment. The Small Piece Holder features abrasive faces that sandwich small pieces to secure them while they are machined. Large handles provide control and stability, allowing the user to create smoothy routed edges while keeping their hands a safe distance away from the sharp cutters of the router bit.

"The Small Piece Holder delivers great control of small pieces without the worry of running fingers too close to the router bit," says Steve Krohmer, Rockler's Vice President of Product Marketing. "Having the workpiece secured allows folks to concentrate on the cut to get the best possible results."

The Small Piece Holder features opposing clamp faces with abrasive anti-slip material (similar to that used in gripping strips on stairs) to hold the workpiece in place. One face is adjustable with push-button quick release to instantly set the desired width. Two adjustable pins hold the workpiece down against the table when they are tightened in place flush against top of the workpiece. Large handles extending vertically on either end make the Small Piece Holder easy to control while holding workpieces up to 8-3/4" wide.

The Small Piece Holder (57896) is priced at \$49.99 and can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler.com, or from the Rockler catalog. For store locations or a free catalog, please visit www.rockler.com or call 1-877-ROCKLER.
