

VideoCloud 365

Simple conferencing. Professional quality. Fully interoperable. Highly secure.

Managed & maintained by the UK's experts in Video Conferencing & focused on high performance, resilience, security and the environment, VideoCentric's VideoCloud Portfolio has been built to provide high quality video communications for your business, without the need to deploy on-premise infrastructure on your network.

VideoCloud 365 provides a highly secure, highly interoperable video conferencing service for your organisation. This anything-to-anything service provides secure HD Virtual Meeting Rooms & point-to-point gateways for seamless interoperability between any professional video conferencing endpoint, Microsoft Lync & Office 365 client, desktop software, mobile & tablet app, Skype & WebRTC customer and audio-only user.

- Crystal clear HD video, audio & data conferencing
- Enable your distributed teams & home workers to collaborate effectively
- Connect any room system, desktop, tablet & smartphone
- Fully interoperable with Lync, Office 365, Skype & WebRTC
- Fully customisable branding
- Auto dial VMR's, Virtual Auditoriums & Entry Foyer options
- 100% uptime record, highly secure & resilient infrastructure
- Most energy efficient data centre in UK

Combining world leading technologies & award-winning services & support, the VideoCloud 365 service enables your organisation to make huge cost savings whilst improving productivity & efficiency, all whilst providing the same experience as an on-premise deployment.
