IMMUNIZATION MANAGEMENT SIMPLIFIED

Tracking immunizations for healthcare personnel is no simple task. You may also be managing immunization requirements for both staff as well as external agencies, including contractors and volunteers. Sorting through endless paper files and fumbling through cumbersome spreadsheets can now be a thing of the past. **Get on top of your immunization compliance the easy way with Venato.**

Venato is a comprehensive, simple-to-use solution that manages and monitors immunization records for your entire healthcare organization. Your staff and department managers are automatically notified when staff immunization records are nearing expiration. They'll receive email notifications beginning 90 days out, and at regular intervals until the requirement is satisfied.

Intuitive, roll-up summaries make it simple to determine if your staff is meeting both critical and non-critical immunization requirements. **This insight empowers you to take control of immunization compliance and meet your patient safety goals with a click of the mouse!**

For Your Healthcare Organization
Manage immunization records for your healthcare personnel and easily monitor compliance based on your organization's specific requirements.

For Healthcare Personnel
Keep track of immunizations, certifications, and licensure in one place and access them no matter where you go.

VENATO LETS YOU:

- **Automate the tracking process**
- **Shift adherence responsibility to HCP**
- **See a snapshot of staff immunization records**
- **Report flu vaccination numbers directly to NHSN**
- **Initiate successful Immunization Campaigns**
- **Monitor staff compliance today and into the future**
- **Determine impending compliance issues at a glance**
- **Customize requirements at the position and department level**

Venato is a secure cloud-based solution that integrates with your existing HRMS.
