

iBOX®

#1 BIOMETRIC Secure Storage

BARSKA® BIOMETRICS
Advanced Biometric Technology

Dual Access Biometric Secure Storage

The new iBOX® Dual Biometric Secure Storage Device by Barska is an innovative portable secure storage device that allows the user to quickly store and retrieve important valuables. The iBOX® features two biometric fingerprint scanning sensors, which provides quick keyless entry and eliminates the need to use a key to open the iBOX®.

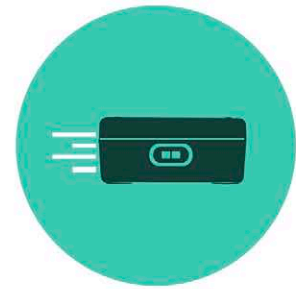

Dual Scanners

The Dual Access Biometric Scanners feature a 500 DPI Optical Reader, while providing convenient back-up reliability with the unique Dual Scanner System.

Keyless Entry

A Touch Sensor detects when a finger is placed on the Biometric Scanner, which quickly opens the iBOX® and eliminates the need to use keys.

Durable & Convenient

The durable ABS construction and the compact size of the new iBOX® allows it to be easily transported while keeping valuables secured and protected.

Security Solution

The iBOX® has been designed to be the ultimate portable security solution, giving the user the peace of mind that their valuables are safely secured, yet still accessible with just the touch of their finger. The inside dimensions are spacious enough to accommodate multiple items such as cameras, tablets, smart phones, passports, money, jewelry, and other valuables. The convenient size of the iBOX® makes it ideal for home, office, travel, car, and student use.

How iBOX[®] Works

The iBOX[®] Biometric Scanner acts as the lock that only the right fingerprint can open. Once a finger is placed on the Biometric Scanner, the iBOX[®] immediately goes to work analyzing the print and comparing it to the iBOX[®] database. Within 1 second, iBOX[®] can accept or reject the fingerprint that it has analyzed.

Biometric Module

The iBOX[®] Biometric Module Prism is made with a protective synthetic glass that allows for continually accurate scanning throughout the lifetime of the product.

Fingerprint Algorithms

The iBOX[®] analyzes multiple identifying features on each fingerprint, and then compares them to existing fingerprints that have been registered in its database.

Energy Efficiency

The low and efficient power usage of the iBOX[®] allows for up to 2 years of battery life on 4 AA batteries with normal use.

Admin Users

Two Admin User Profiles can be registered into the iBOX[®], which ensures that only the approved Admin Users can register the additional 120 fingerprints into the fingerprint database.

iBOX[®] Features

The industry's first Dual Access Biometric Scanner contains many innovative features, including:

- Accurate Fingerprint Identification
- 120 Fingerprint Memory
- 2 Admin User Fingerprints
- Advanced Synthetic Coated Optical Prism
- Automatic Fingerprint Detection
- Energy Efficient Battery Use
- 500 DPI Biometric Reader
- Less Than .0001% False Acceptance Rate
- Tough, Durable Construction
- Lightweight & Compact Portable Design

Specifications

The iBOX[®] has been designed to be the leader in portable secure storage. With a Dual Access Scanner that eliminates the need for keys and the ability to store up to 120 fingerprints, the iBOX[®] can be programmed to be accessible only to select users. These select users are added to the iBOX[®] memory by first scanning a registered admin fingerprint. The tough ABS body and the Automated Single Point Locking System helps keep valuables safe and secure, while the 10.25" x 8" x 5" interior dimensions provide 410 cubic inches of storage space for storing multiple items and valuables.

Brand:	Barska
Model:	AX12458 iBOX [®]
Weight:	3.96 lbs
Scanner:	Dual Scanner
Outer Size:	11.25" x 10" x 5.25"
Inner Size:	10.25" x 8" x 5"
Case Material:	PC, ABS Plastic
Fingerprint Memory:	120 Fingerprints, 2 Admin
Locking System:	Automated Single Point
Warranty:	1 Year Limited Warranty
Batteries:	4xAA, Included
Included Accessories:	Protective Floor Mat, Screwdriver, Manual, 4xAA Batteries
