KH™ KH Industries

Add-A-Lights: Portable Lighting Systems

Portable, Industrial-Grade Feed Through Lighting for Demanding Environments

*Slim design is ideal for narrow spaces, **LED or Fluorescent Available!***

Meet the new LED Add-A-Light Durable, intensely bright, and energy efficient!

String up to 20 lights together.

- No mercury
- No RF interference
- No UV radiation

53" Models:
LED: 1800 Lumen; 18 Watts
Flour: 1550 Lumens; 34 Watts

30" Models:
LED: 900 Lumen; 10 Watts
Flour: 1050 Lumens; 20 Watts

APPLICATIONS:

- Bus/Vehicle Lift Lighting
- Aerospace/Helicopter MRO
- Emergency Shelter/Tent Lighting
- Vessel/Shipyard MRO
- Tunnel and Bridge Lighting
- Furnace/Smoke Stack MRO
- Scaffolding Temporary Lighting

FEATURES:

- Durable design for continual use in industrial settings
- 14/3 SJOW cable that is water and oil resistant
- 6' or 25' standard cord length
- 2' standard exit cord
- Heavy duty power outlet NEMA 5-15R for daisy chain use or use with power tools
- String lights together for bright continuous illumination
- Comes with (2) 6" metal hanging hooks
- Available in end unit models

Custom configuration available

MADE IN THE USA

SMD LEDs: More Rugged, Energy Efficient, and Longer Lifespan

With KH Industries' new SMD LED's the Add-A-Lights are shock and vibration resistant and feature an aluminum extruded back heat sink.

The LEDs are protected inside highly impact resistant CAB tube shield with a thick aluminum circuit board for maximum heat dissipation.

High quality SMD LEDs emit a higher brightness because of their wider beam angle of 120 degrees, making it ideal for wide area or focused task lighting.

Safety yellow plastic end caps and handles, CAB tube shields, combined with SMD LED's create a virtually unbreakable portable lighting system.

SMD LED Feature High Brightness and Superior Color Rendition:

High quality SMD LEDs emit a higher brightness because of their wider beam angle of 120 degrees, making it ideal for wide area lighting solutions.

Superior color rendition and a frosted bulb for defused light output.

Add-A-Lights: Portable Lighting Systems

LED ADD-A-LIGHTS

- Daisy chain up to 20 lights together
- Long lasting, rated up to 50,000 hours
- Aluminum heat sink allows for even heat disbursement
- Instant on; no buzzing, humming, or flickering
- No mercury; no RF interference, no UV radiation

Electrical Operation:
- 120-Volts/60-Hertz
- Also available: 277 VAC, 50/60 Hz
- LEDs use a driver instead of a ballast

ALL ADD-A-LIGHTS LIGHTS FEATURE:

- Power Cord: 6' or 25' input with 2' output
- 14/3 SJOW black (oil and water resistant cable)
- Heavy duty KH Flip Seal NEMA 5-15P & 5-15R on Add-A-Lights
- Heavy duty KH Flip Seal NEMA 5-15P on end units
- Includes (2) 6" metal hanging hooks
- Optional wall clamps and magnetic clamps (pictured right)

FLUORESCENT ADD-A-LIGHTS

- Daisy chain up to 12 lights together
- Standard T12 fluorescent bulbs
- CAB tube shields that resist breakage
- Rubber handles and end caps
- Reflective tube shields standard; clear available

Electrical Operation:
- 120 VAC, 60 Hertz with ballast
- Ballast: Electronic rapid start, high frequency

Optional wall & magnetic clamps

Heavy Duty Flip Seal Plug and Connector
