A Trusted OEM Partner for 23 Years ...and Counting

Your products are important. They improve the quality of our lives and may even save them. Yet you are not immune to the constant demands exhausting company resources, creating distractions and diverting your company from what you do best.

OEMs are under growing pressure to offer the most innovative products at competitive prices. When faced with constant technological change, increasing regulatory requirements and greater complexity from globalization, it can be difficult to stay focused.

What could you accomplish with a business partner that could take on many of these challenges and allow your organization to focus on what is really important – your products and services?

How about a partner with a proven ability to provide technology and services for your industry? A partner you can rely on to reduce the complexities, uncertainties and risks of your business environment? A partner you can trust.

Since 1991, CONTEC DTx has developed long-standing partnerships with OEMs around the world. As a technology solutions provider, our customers count on us to provide world-class Engineering, Manufacturing and Supply Chain Management services. We provide value through product design and innovation, life cycle management, logistics and post-production support.

Our solutions free resources, reduce overall cost, speed time to market and allow your company to focus on its core competencies.

COMPUTING PLATFORMS

Embedded computing technology providing the engine and intelligence for your device.

- Rack Mounts & Servers
- Towers & Workstations
- Small Form Factor
- Custom Embedded Solutions

INDUSTRIAL COMPUTING

Technology designed to withstand punishing industrial and manufacturing environments.

- High Temperature, High Humidity, Dust, Vibration and Shock
- Build to Order Computers
- Panel Computers
- Compact & Fanless Configurations
- Single Board Computers (SBC)

DISPLAYS & AIOs

Advanced, cost effective and high reliability displays & All-in-Ones for OEMs requiring customized, long life solutions.

- Medical, Industrial & Commercial Grade
- Standard & HD
- Touch Enabled
- Rugged Tablets & Laptops

EXPANSION BOARDS

Electronic components providing the building blocks to create, monitor and control your device.

- Digital & Analog I/O
- DAQ & Motion Control
- Serial Communication
- PCI, PCI Express, & USB

CONTROL, DAQ & MONITORING

Innovative solutions integrating data management or sensor and process control instrumentation with computing technology for OEM devices. This is ideal for automation, machinery, controls, monitoring & data acquisition products.

- Control and Measurement Modules
- Embedded Controllers
- Industrial & Process Control Automation
- Instrumentation Testing

NETWORK TECHNOLOGY

The "Internet of Things" is not possible without access to the internet. Networking solutions for:

- Commerce
- Factory Automation
- Distribution
- Healthcare
- Transportation
- Security

MARKETS & SERVICES

Manufacturing Automation

Energy Management

Medical Device

Network Technology

Military Aerospace & Government

Digital Signage

MARKET APPLICATIONS

- Pharmaceutical Distribution
- In-Vitro & Imaging Diagnostics
- Patient Monitoring
- Surgical Systems
- Clinical Information Systems
- Medical Imaging
- Solar Power Measurement Systems
- Automotive Assembly Line Technology
- Airport Baggage Handling
- High Speed Automated Warehouse Management Systems
- Automotive Engine Test & Inspection Technology
- Electric Railway Monitoring & Communication Systems
- Factory Material Handling Vehicles
- Industrial Machine Data Acquisition and Motor Control
- Food Processing Equipment
- Threat Detection/Screening Technology
- Virtual Training & Simulation
- Security Systems and X-Ray Screening
- Airline Ticketing & Customs Screening
- Dispatch & Emergency Management Systems
