

H5's Managed IaaS

Exceed client expectations.

In the face of exploding client data volume, unpredictable eDiscovery demands and increased security risk, maintaining a secure, cost-effective, state-of-the-art litigation support infrastructure has become a serious challenge for law firms. Outsourcing is one solution. But simply turning over the eDiscovery process to a vendor sacrifices control, revenue potential and a key source of differentiated value that firms can offer their clients. An ideal solution would offer litigation support professionals full control of these services within a secure, scalable and professionally maintained infrastructure—without the upfront and ongoing software, hardware and maintenance costs. That's where H5 comes in.

› Increase competitive advantage, reduce cost and risk

H5's Managed Infrastructure-as-a-Service (IaaS) provides law firms and their clients the ability to manage Relativity® hosting, processing, analytics and assisted review without the burden of capital expenditure and resource drain. The dollars saved can be applied elsewhere to benefit your client and enhance your firm's competitive advantage.

With H5's IaaS, platforms and client data reside within our SOC2 Certified data center, ensuring compliance with the highest industry security standards. You pay for only the infrastructure you use, avoiding upfront hardware investments, annual licensing requirements and software maintenance fees. Investments are predictable, an aspect of IaaS that every constituent values.

› Leverage expert support

H5's Managed IaaS clients also benefit from around-the-clock support of H5's dedicated team of Relativity® Certified Administrators and eDiscovery experts. With more than 14 years of hands-on experience supporting complex litigation and highly sensitive investigations around the world, our team works consultatively with each client to maximize the benefits of the IaaS offering in their own practice.

Managed IaaS Benefits

› Let H5 manage the risk while you reap the benefits:

- Control
- Security
- Scalability
- Cost-reduction
- Expertise
- Overflow support
- Access to H5's expert search services

H5 What's ours is yours.

→ Managed IaaS Benefits

• CONTROL

Maintain hands-on control of secure eDiscovery processing, hosting, analytics, and assisted review applications at a significant cost savings.

• SECURITY

H5's Soc2 Certified, state-of-the-art data center, ensures compliance with the highest industry standards for security without commensurate cost and operational oversight.

• SCALABILITY

Infrastructure that can grow as and when necessary to scale to the litigation support load.

• COST-REDUCTION

No hardware investments, no annual licensing requirements and no software maintenance fees. Costs are predictable and constrained to actual use of the environment.

• EXPERTISE

24x7 project management and support by H5's Relativity Certified Administrators.

• OVERFLOW SUPPORT

When the demands of your practice exceed your team's immediate capacity, you can call upon our seasoned team of eDiscovery project managers for temporary overflow support.

Data Security

Data security is paramount at H5. We're proud to offer our clients the full scope of security with data managed within our SOC2 Certified, state-of-the-art Digital Realty-based data center.

(Data center specs available on request.)

Make H5's eDiscovery and search expertise your own

In addition to the support of H5's Relativity Certified Administrators, H5's managed IaaS clients have direct access to H5's industry-leading search services. Available on demand and only as needed, H5's expert search services, including search-term consultation, data reduction, key document identification and related analyses are designed to reduce costs defensibly while contributing strategically to litigation and investigatory outcomes.
