Scytl Online Voting
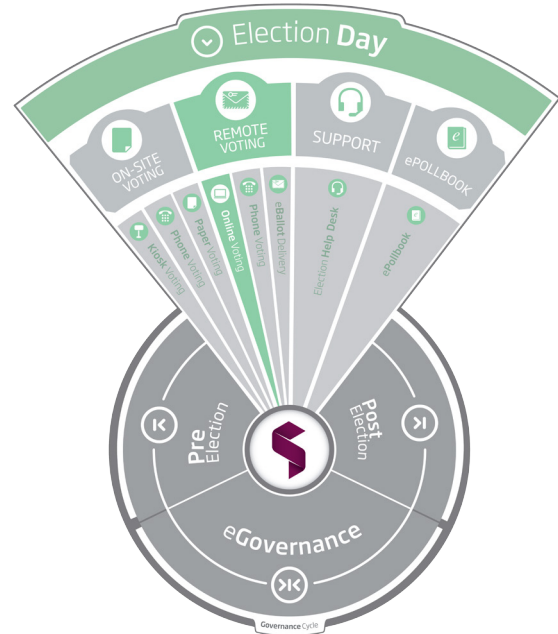

Offers numerous advantages over traditional paper balloting, including **easy access for absentee & overseas voters.**

Scytl Online Voting enables voters to securely and easily cast their vote from any location and on any device with Internet access. Internet voting enfranchises all voters, including remote voters (overseas, military, etc.), while ensuring privacy and results integrity, reducing the costs involved with conducting an election and ensuring that ballots are free from tampering.

Scytl's voting receipts, digital signatures, and data encryption have been certified by twelve countries and are successfully used in numerous elections across the globe.

- Online voting leadership & experience: 87% of binding online elections worldwide.

- Internationally audited platform with voter self-verification, adapted for voters with disabilities.

- Available on Google Android, Apple iOS, and Blackberry.

- Results integrity, voter privacy and immutable logs, fully auditable.

Scytl eDemocracy Platform / Election Day /

We integrated Scytl's electronic voting solution into our eGovernment platform. This innovative solution has demonstrated its high security and flexibility levels. Scytl has provided us not only with a product, but also with a very competent team that has allowed us to set up a really innovating experience for our voters."

Scytl eDemocracy Platform

Helping organizations around the globe improve participatory democracy, citizen empowerment and public transparency via innovative technology that covers the election and governance cycles from end-to-end.

Scytl eDemocracy Platform / **Solutions** /

Pre-Election

Scytl's solutions assist election administrators with the planning, organizing and training activities that accelerate as each new Election Day approaches. From tracking campaign contributions, training poll workers, registering voters and delivering eBallots to overseas and military voters, Scytl provides efficiencies for elections and the officials that conduct them.

Election Day

During Election Day, the most critical period of the election cycle, election officials can rest assured that robust and user-friendly tools are being utilized both by election administrators and voters. Whether in-person or remotely, voters will experience a state-of-the-art web interface to answer questions and cast their vote.

Post-Election

After Election Day, work is far from over. This is where some of the most important steps take place to ensure accuracy and effectiveness of the voting system, aggregate and present election results for public consumption, and use the information learned from this election to make the next one even better.

eGovernance

Scytl provides the tools and technology to help manage civic and political actions during terms in office between election cycles. Government bodies and politicians can better communicate with and engage citizens by seeking opinions and promoting ongoing dialogue as well as monitor public opinion to incorporate them into electoral programs. In addition, legislative bodies can regulate agendas and facilitate in-chamber voting sessions.
