

ALTEN

GAS & PROPANE BATTERY CHARGING DC GENERATORS

Batteries are a vital component for the comfort and safety for your crew and passengers. An ALTEN Battery-Charging DC Generator can jump start or recharge battery banks quickly and safely, wherever and whenever.

Flat batteries mean downtime and lost productivity. Portable, rugged and dependable, ALTEN Battery-Charging DC Generator can be taken into the most out of reach areas on earth to get your equipment going again.

Recreationalists and professionals in competitions use powerful electric trolling motors that can drain batteries quickly, so don't take a chance when you are after that trophy fish, keep the ALTEN Battery-Charging DC Generator on hand.

Backup power does not have to mean an AC generator. Batteries and power inverters deliver AC power to your essential loads, seamlessly and quietly. With an ALTEN Battery-Charging DC Generator you'll never be left in the dark.

Without Roadside Assistance, a flat battery can mean a long walk home. Rugged and dependable ALTEN Battery-Charging DC Generators are compact, portable and ready to boost or charge your batteries anywhere.

Batteries used in remote alternative energy systems sometimes run dead. Service staff can quickly recharge a battery bank with an ALTEN Battery-Charging DC Generator to keep communications and data flowing.

ALTEN is a recognized Honda and Subaru D-OEM manufacturer of gas and propane battery-charging DC generators.

Originally developed and produced in Australia since 1998, ALTEN assembles the entire product line in the USA for the North American market. Rugged and reliable, ALTEN Battery-Charging DC Generators are ready to boost or recharge batteries anywhere, anytime.

Large or small battery systems can be recharged quickly and safely during emergencies, repairs or scheduled maintenance. Any 12 or 24 volt battery used with renewable energy systems, heavy industrial equipment, commercial marine or telecom applications can be quickly recharged with an ALTEN Battery-Charging DC Generator. Check out our Duke lineup of diesel DC generators and custom design-build packages for specific remote power applications.

MODEL NUMBER	G1	G2	G3	P1
Models				
Voltage Model	12 Volt	12 / 24 Volt	12 / 24 Volt	12 / 24 Volt
Low Voltage (Float)	14.0 V Regulated	14.0 / 28.0 V Regulated	14.0 / 28.0 V Regulated	-
High Voltage (Bulk)	14.8 V Regulated	14.8 / 28.8 V Regulated	14.8 V / 28.8 V Regulated	14.8 V / 28.8 V Regulated
Max Amp Output	55 Amps	120 / 45 Amps	160 / 80 Amps	120 / 45 Amps
Voltage Cut Out	18 Volts	18 / 36 Volts	18 / 36 Volts	18 / 36 Volts
Weight	12kg / 26lbs	26kg / 57lbs	31kg / 68lbs	56kg / 123lbs
Dimensions (LxWxH)	16.1" / 10.8" / 14.6"	20.0" / 15.2" / 15.0"	20.0" / 15.2" / 15.0"	20.0" / 20.0" / 20.0"
Engine	Honda GXH50	Honda GX160	Honda GX200	Subaru Air-cooled
Max Engine Power *	2.1HP, 7000rpm	4.8HP 3600rpm	5.5HP 3600rpm	5.7HP @ 4000 RPM
Fuel Capacity	.77L / .2 US Gal	3.1L / .82 US Gal	3.1L / .82 US Gal	3/8" fuel connection
Fuel Consumption	~ 4 Hour Run Time	~ 4 Hour Run Time	~ 4 Hour Run Time	0.4 m3/hr @ 100% load
Fuel Type	Gasoline	Gasoline	Gasoline	Propane (ALTEN converted)
Oil Capacity	.25L / .26 Qt	.6L / .63 Qt	.6L / .63 Qt	.6L / .63Qt
Start Type	Recoil	Recoil / Electric	Recoil / Electric	12v Electric Start & Recoil Pull Start Automatic Start & Remote Start (2 wire)
Noise Level (max)	74 dBa @ 7M	74 dBa @ 7M	74 dBa @ 7M	74dBa @ 7M
Engine Warranty	Honda 3-Year	Honda 3-Year	Honda 3-Year	Subaru 5-Year

Product specifications and model availability are subject to change without notice.

* The power rating of the engine indicated is the net power output tested on a production engine for the engine model and measured in accordance with SAEJ1349 at 3600 RPM. Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the engine in application, environmental conditions, maintenance, and other variables. - Honda USA
