Isabel Symptom Checker

Provide Access to the Best Symptom Checker

For the first time, institutions can provide patients with valuable access to an easy to use, yet highly sophisticated, validated medical diagnosis system that is much more powerful than previously available symptom checkers.

The Isabel Symptom Checker helps patients understand symptoms, engage in their healthcare decisions in a meaningful way, and helps direct them to the most appropriate setting of care within your organization.

“Any time a patient can be more informed about their health and what their symptoms might mean, I think that’s a good thing.”

Charles Bareis, MD, FACP, chief medical officer of MacNeal Hospital in Chicago.

Driving Engagement with Empowered Patients

The Isabel Symptom Checker is a unique and powerful tool designed to empower and engage healthcare consumers in your network. The patient is the most important piece in the healthcare puzzle and by providing them with a trusted source to become informed about their symptoms you can engage them on a whole new level.

Why choose Isabel Symptom Checker for your system?

Enhance Patient Engagement

The Isabel Symptom Checker is the most advanced symptom checker of its kind. With extensive clinical validation, it is based on the system used by healthcare professionals around the world.

It is both very sophisticated covering over 3,500 diseases, yet is very easy for patients to use because it understands normal everyday language.

Increase Traffic and Improve Loyalty

Increase website traffic and stickiness by providing the latest and most powerful symptom checker currently available.

Isabel Symptom Checker also can be mapped directly to your physician or office finder tools to enhance in-network participation and assists with directing consumers to the most appropriate care setting within your organization.

Easy to Integrate and Brand as Yours

Isabel provides complete API integration capabilities which allow enhanced branding opportunities on your consumer facing web pages or within your patient portal.

Providing your patients with a trusted resource mitigates generalized web searches for healthcare/diagnosis information saving time and effort for your providers.

Provide Access to the Best Technology Available

Isabel Symptom Checker is easy to use for consumers and is based on the same system that doctors and nurses around the world rely on to help with diagnosis. Using the latest natural language search technologies, the Isabel system can take a pattern of multiple symptoms entered in everyday language and instantly compute the most likely diagnoses from our vast database. Isabel is acknowledged as the clear leader in medical diagnosis tools.
